MINO-0552 Dome Valley

12 December 2022

Provide some information about the issues on State Highway 1 at Dome Valley.

Waka Kotahi NZ Transport Agency's response:

- Recent chip seal resealing work on State Highway 1, Dome Valley near Frogpool Farm falls short of expectations for work on state highways and will need to be rectified. The chip seal site work was completed earlier in the week, and following heavy rain on Thursday, chip began being lost from the surface. A decision was made to asphalt and complete works on Sunday night (this was deferred due to weather).
- Humid weather on Saturday caused the surface to bleed (melt) making the surface sticky – causing the seal to lift off and stick to vehicle tyres. Traffic management was put in place on Saturday afternoon.
- Fulton Hogan is completing urgent remedial work on Monday 12 December. Traffic management will be in place.
- The Sunday night closure allowed for cleaning and clearing of the loose chip in preparation for asphaltting works planned on Monday night.
- Fulton Hogan will continue with repair work on other sections of the road where some of the loose bitumen chip has been tracked onto adjacent road sections. All other planned general maintenance and repairs activities will also be taking place as scheduled.
- Waka Kotahi encourages anyone who has received damage to their vehicle as a result of this issue to lodge a compensation claim with Fulton Hogan for action. This can be done by emailing NorthlandHighwayCustomer@fultonhogan.com or phoning 09 4700 718.
