Hi all,

On the go today:

Out of Scope

3. **Melling Interchange and Petone to Grenada:** The statement below was provided in response to questions from the *Dominion Post*.

The Melling Interchange and Petone to Grenada are two of a number of projects currently being reviewed by the NZ Transport Agency, to evaluate whether it aligns with the new vision for our transport network. Once this work has been completed, work on these projects may proceed as currently planned, be staged differently or explore lower cost options. This could mean that previous shortlist options, or even the preferred option, may change. The NZTA Board met in December to consider next steps, however there is still more work to be done. We expect to be able to make announcements about decisions on these projects in the coming months.

Regards,

Andy K
