Hi Chris

All the trees are down plus a few more which looked unstable when u remove the adjoining tree/trees. All trees were down by 10am this morning (exc Layby site). The Layby is all tidied up, trees felled and good lines for deer fencing. These two guys (s 9(2)(a)) are super efficient and first focus was dropping trees and tomorrow they will work on tidying up the s 9(2)(a) property as all felled material is on the farm land. So we have saved 1-1.5 days in traffic magt costs doing it this way. The Downers traffic guys were very helpful and worked in well with us at all stages.

Will keep u posted..
