

## RAIL AND MASS TRANSIT

### Auckland Light Rail

The Light Rail project team continues to work intensively on the response to the Ministry of Transport's Response Requirements Document, which is due on 29 November 2019, as well as the draft business case, which will be submitted with the response. The key elements of the response remain consistent with the Transport Agency Board paper dated 31 October 2019. The Auckland Light Rail Steering Group walked through the full response with the project team on Friday 15 November 2019. Interactions with the Ministry of Transport through the Interactive Engagement Process have been positive. The Light Rail team will provide a verbal update on the response at the Board meeting.
