Please note the following concerning the data contained in this spreadsheet:

- This data is provided from the road traffic crash database; Crash Analysis System (CAS) version 2.5.0
- Waka Kotahi NZ Transport Agency maintains CAS which is updated once a Traffic Crash Report (TCR) is received from NZ Police sometime after the crash.
- Data is limited to fatal and injury crashes for the years 2010 to 2023 as recorded in CAS to date - 31/07/2023.
- Data in 'near Schools' is limited to injuries to people aged 5-16 within 1km of a school from 0700-0900 and 1430-1530 Monday-Saturday.
- A crash, to be recorded in CAS must have occurred on a road. The CAS definition of a road is any street, motorway or beach, or a place to which the public have access with a motor vehicle, whether as of right or not e.g. a public car park.
- Due to the police reporting time frame and subsequent data processing, there is a lag from the time of a crash to full and correct crash records within CAS.
- Fatal, Serious Injury and Minor injury crash report data is usually recorded in CAS within one working day of Waka Kotahi receiving it from NZ Police. Data relating to non-injury crashes may take up to 7 months before it appears in CAS.
- Due to the nature of non-fatal crashes, it is believed that these are under-reported, with the level of under-reporting decreasing with the increasing severity of the crash.
- Due to the Covid-19 pandemic, NZ had a 4-level Alert system in place from 21 March 2020 until this changed to a Traffic Light system from 3 December 2021 to 12 September 2022. The amount of traffic on the roads during level 4 lockdowns was greatly reduced, which consequently reduced the number of road crashes. Road movements under the Orange and Red levels of the Traffic Light system would also be reduced due to the restrictions in place, so data from these periods will not align with previous trends.
- The cause of a crash cannot necessarily be attributed to any one factor (eg speed) as a crash may have multiple factors.
- 2022 and 2023 data is incomplete in CAS but the figures provided are what is currently in CAS as at 31/07/2023.
- CAS does not hold accurate data on hospitalisation of people injured in crashes, however, a serious injury would normally require hospitalisation, whereas some people with minor injuries may also end up in hospital.
