

Connect Rotorua

Community consultation on options

Haere mai, Welcome

The Transport Agency, on behalf of the Government, is working with Rotorua Lakes Council to future-proof Rotorua's transport network.

Today is about updating you on the Connect Rotorua programme. The programme addresses congestion and local road access onto the state highway and supports the work Council is doing to revitalise the inner city. The two projects are:

Central Corridor

SH30A /
Amohau Street

Eastern Corridor

SH30 /
Te Ngae Road

Your views are important

Please complete a feedback form before you leave

Your input today is valuable.

Since October 2016 workshops have been held with Rotorua Lakes Council (RLC) and key stakeholders, including Bay of Plenty Regional Council, iwi partners, emergency services, and freight and tourism groups, to look at the problems and possible solutions for both the central and eastern corridors.

The team is here to present to you the short list of options, including the favoured options, that best meet our requirements and hopefully address your concerns and desires.

Please have a look at the information on display. Today is an opportunity for you to provide feedback which will inform our decision making process when selecting the preferred options.
