EAST WEST LINK PROJECT TO BE CONSIDERED BY BOARD OF INQUIRY

The NZ Transport Agency has welcomed a Ministerial decision to refer its application for designation and resource consents for the East West Link project to a Board of Inquiry.

The Transport Agency lodged its application with the Environmental Protection Authority (EPA) in December 2016. The EPA reviewed the application and recommended that it be treated as a matter of national significance that should be referred to the Board of Inquiry.

For further information, see the Transport Agency media release. You can also view the application online.
