

1 Temporary diversions on local roads

Three local roads which cross the Expressway – Ralph Road, Waring Road and Orini Road – will require temporary diversions while bridges and approach embankments are built over the Expressway. Work will start shortly and the diversions will minimise disruption to road users while the bridges are built.

Ralph Road

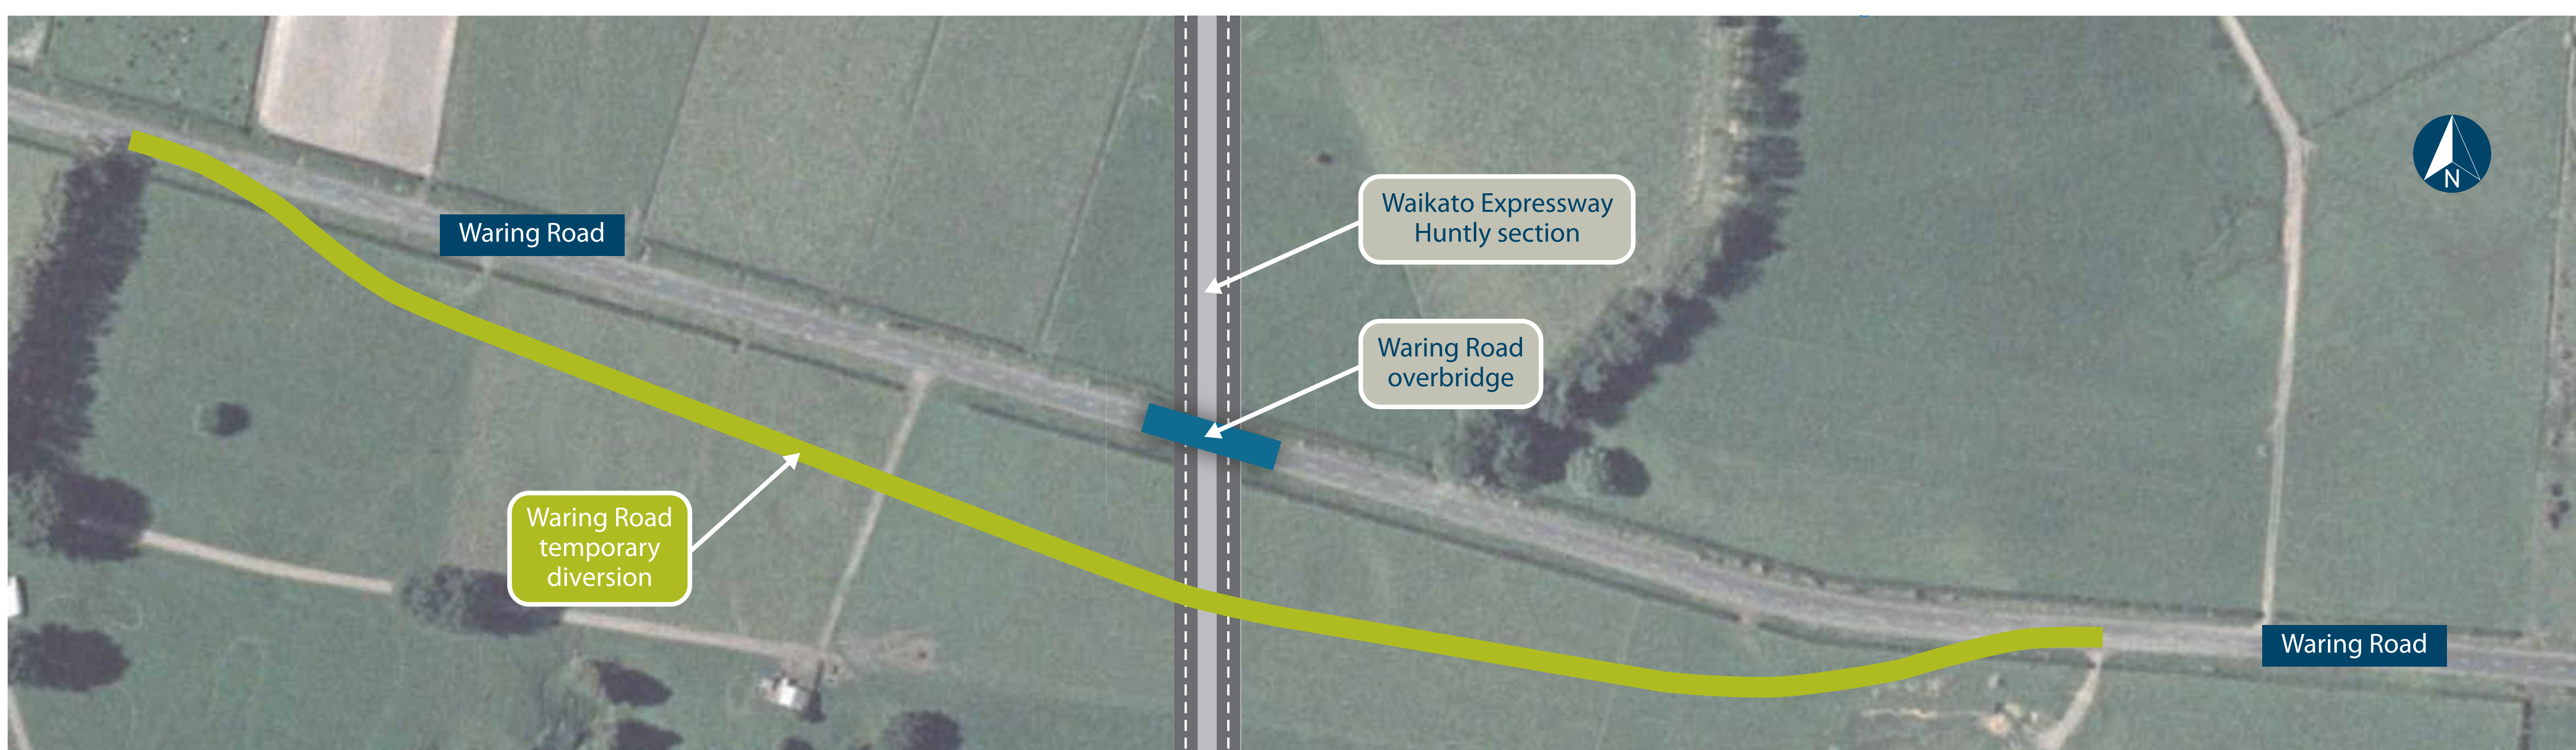

The temporary diversion will be in place from late 2015 until late 2016. When the bridge is completed traffic will be switched on to the realigned Ralph Road and new bridge.

Graphic shows the temporary road and the new alignment of Ralph Road

Waring Road

The diversion will be in place from late 2015 through to late 2017 when traffic will be switched on to the new bridge.

The Waring Road diversion

Orini Road

There will also be a temporary diversion on Orini Road near where it meets the Expressway. Full details are yet to be finalised. It will be in place from early 2016 to late 2017.
