

STATE HIGHWAY 1 TRAFFIC RE-ROUTE BETWEEN WAIKANAЕ & TE HORO/ŌTAKI COMING UP

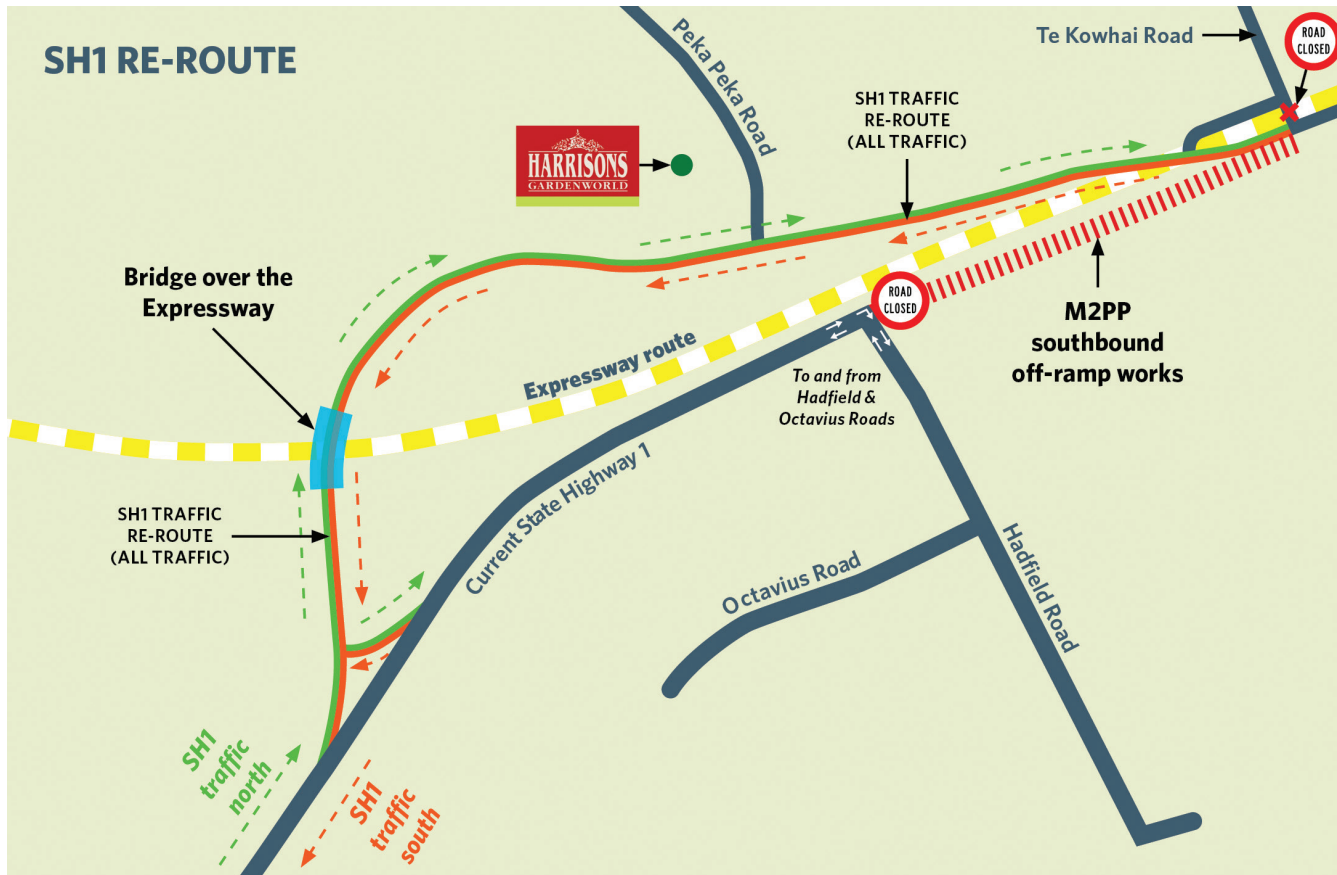

RE-ROUTE STAGE 1 - Northbound SH1 traffic will be re-routed along a new link road past the top of Peka Peka Road - expected to be for a few days and no more than a week.

THESE WORKS ARE PLANNED FOR OCTOBER 2016

Our works are weather dependent so if anything changes we'll keep you in the loop. While we plan to our best ability, there are times when weather, or other things, change that plan.

Do you drive north of Waikanae or south of Te Horo/Ōtaki on State Highway 1?

The State Highway (SH1) route through Peka Peka is changing temporarily.

- This is while the new Mackays to Peka Peka Expressway is finished.
- The new route is about 350 metres longer than the current drive on SH1. It will be in place until the Expressway opens.
- Find out more in this brochure.

RE-ROUTE STAGE 2 - All SH1 traffic will be re-routed along the link road past the top of Peka Peka Road.

SH1 RE-ROUTE & EXPRESSWAY CONSTRUCTION THROUGH PEKA PEKA

If you drive the existing part of State Highway 1 where we're working, you'll have noticed our team working on and around SH1 over the past months.

There'll be a lot more happening as the Expressway opening gets closer, including several re-routes of local and SH1 traffic.

This brochure tells you what to expect, when we're planning to do work and what that might mean for you while we build the final local and Expressway connections.

STAGED SH1 RE-ROUTE

There are temporary re-routes of SH1 traffic through Peka Peka planned for October that will stay in place until the Expressway opens.

These changes are so we can continue works in the Peka Peka area as quickly as possible, without having to close lanes, and to keep road users and workers safe.

We'll be telling road users about the final start times for these re-routes before then, through local and wider media and our regular channels like the email *Express Lane* newsletter. (You can sign up for newsletter updates at expresslane.buzzit.co.nz/subscribe).

There'll also be clear signage before and during the changes to help guide you to the correct route.

The re-routes will carry SH1 traffic along the new local link road and over the bridge we've built as part of the Expressway construction. Once the Expressway is open, local traffic will use this road to connect with Peka Peka Road, Te Kowhai Road, Hadfield Road and the partial interchange northbound on-ramp.

For SH1 traffic heading north from Waikanae
- the new route starts about 2.5 kilometres north of Waikanae.

For traffic travelling south from Ōtaki/Te Horo
- the new route starts about 4.5 kilometres south of Te Horo.

There will be **two stages** to the SH1 route change after we've completed building an access ramp near the top of Te Kowhai Road along the state highway.

STAGE 1

First, all northbound SH1 traffic will be re-routed along the link road past the top of Peka Peka Road. We expect this will be for a few days and no more than a week.

STAGE 2

After this, both north and southbound SH1 traffic will travel this new route. At that point we'll be able to start work on the southbound off-ramp from the Expressway, to the north of Hadfield Road, and this area needs to be closed to traffic.

QUESTIONS AND ANSWERS

How will I know which way to go and when?

There will be plenty of clear signage and speed reductions during the works to help traffic safely use the correct routes.

Will the speed be reduced?

The speed limit for the link road will be 70 km/h as it has been in this area throughout the interchange finishing works.

What delays might occur for road users?

We're conscious of the potential for some small delays as people adjust to the new route, and we'll be working hard to keep disruption to a minimum.

LOCAL ROADS DURING STAGE 1

To reach Peka Peka Road from the north - continue on the southbound SH1 route until the new link road turnoff on the right and then travel north back to the intersection with Peka Peka Road.

To travel south from Peka Peka and Te Kowhai Roads - there will be a southbound route open for you to use, over the bridge to the south.

To reach Hadfield Road from the north - continue on the southbound SH1 route and turn left into Hadfield Road. **To reach Hadfield Road from the south** - continue along the northbound SH1 route and follow the link road left. Turn right through the turn bay at the island and continue north to Hadfield Road.
