

NORTHLAND BRIDGES

There are 10 single lane bridges on the Northland State highway network. Many of the bridges are located on the Twin Coast Discovery Route which connects visitors with Northland's tourist destinations. The bridges also carry freight to key markets and ensure communities are connected across the region.

Following the Ministerial announcement on 9 March 2015 to replace one way bridges on the State highway network in Northland, the NZ Transport Agency has undertaken initial investigations into these bridges.

The first four bridges of the programme currently progressing through the planning and investment phase are:

- SH12 Matakohe (Hardies and Anderson) Bridges
- SH10 Taipa Bridge
- SH10 Kaeo Bridge
