

# Mount Iron Roundabout - Traffic Update (November 2023)

Good progress continues on building a new roundabout to keep everyone safe and improve access for cyclists and pedestrians at the busy Mt Iron SH6/SH84 intersection in Wānaka. While not fully completed, the roundabout should be ready to use over the busy Christmas-New Year holidays. The expected full project completion date is April 2024.

## What is different?

The traffic layout and management on or near the roundabout construction site. More details about this below. A lower 30 km/h speed limit that will stay until the project's completion.

## Remember when travelling from:

- Albert Town – give way to all traffic at the SH6/SH84 intersection.
- Wānaka – take the left lane for Albert Town and right for Luggate.
- Luggate – if turning right to Albert Town, give way to traffic from Wānaka, head straight ahead for Wānaka, turn left for Riverbank Rd.
- Riverbank Road – Give way to all traffic.

Thanks for your patience and following the directions of work site crews. This will go a long way to achieving what everyone wants, and that is getting this job completed quickly and efficiently, and keeping project crews, road users, and nearby residents safe.

## Make your trip less stressful by:

- Being prepared for delays.
- Allowing more time for your journey especially in peak morning and early evening traffic periods.
- Driving carefully.
- Observing on-site signs.
- Following on-site signs and traffic management crew directions.
