

# Old Māngere Bridge Replacement Project

## COMMUNITY EVENT SUMMARY

In late October, the project team held a community information day to share an update about what's been happening on site. Nearly 200 people came along and learnt more about construction and key design features of the new bridge.

We also had interactive stands with a spill kit demonstration from our environmentalist, core samples from the seabed and also showcased some cool virtual reality software. Those old enough enjoyed an exclusive site tour led by one of the construction team. To keep the little ones entertained, our kid's section included face painting, colouring sheets and PPE to try on.

Thank you to everyone who joined us on the day!

### You said...

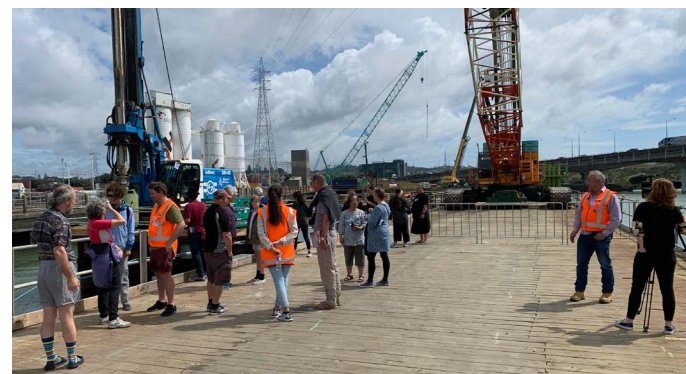

*'It's good to see what's going on'*

*'The tour guide at the site was awesome'*

*'Very good displays... loved the digital engineering'*

### We spoke to the following people at our event:

- Local residents
- Māngere Bridge
  - Onehunga
  - Mount Roskill
  - Hillsborough

People who work in construction

Cyclists

School children

Families

### To help spread the word about our community event, we:

- included details in our printed newsletter and e news
- put up posters in local shops
- arranged a flyer drop to the local area
- shared a media release.
