

Stage 1B2 update

Notices of Requirement and resource consent applications for Stage 1B2 of the project will be lodged later this year. Features of this stage include:

- Replacement and upgrading of the motorway bridges crossing Otuuwairoa Stream (Slippery Creek).
- Additional traffic lanes.
- A new shared path on the western side and a shared path link to Great South Road on the northern side of the stream.

This stage has been separated out for consenting purposes to allow appropriate time and consideration of the project's impact on the site of cultural significance known as Oopaheke.

Waka Kotahi is working in partnership with Mana Whenua on the many planning and design elements for Stage 1B2 to minimise the project's impacts on Oopaheke and improve cultural, social and environmental outcomes.

Stage 1B2 consents will be lodged under the COVID-19 Recovery (Fast-track Consenting) Act 2020, which provides a fast-track consent pathway to support projects that can boost employment and economic recovery.
