

PROJECT NEIGHBOURS

The Transport Agency endeavours to minimise the level of disruption caused to project neighbours during construction and our contractors will be working within the limits permitted by Auckland Council.

We will provide regular updates on the project's progress and feel free to contact the project team if you would like any additional information.

Residents living close to the motorway may experience some construction activities, including:

- Construction of additional lanes and retaining walls
- Construction of new bridges at Huruhuru Creek, Huruhuru Road bridge and Royal Road bridge
- Construction of the cycleway next to the motorway
- Interchange improvements at Royal Road
- Plant and tree removal and new landscaping
- Construction of new noise walls
- Movement of machinery and construction vehicles
