

TAIPA BRIDGE

WHAT IS THE PROCESS?

- The outline concept will be developed into a scheme design following consultation
- Your input will inform this process, particularly with regards to the town centre
- The project will be developed and constructed through early contractor involvement. We're tendering this now and as part of this tendering process, the concept design for the bridge is being developed
- The design will be developed further and an Assessment of Environmental Effects produced
- Consents will be sought through the Far North District Council and Northland Regional Council
- Construction is expected to start following approval of consents
