

SH29A Barkes Corner roundabout metering

The NZ Transport Agency is reintroducing roundabout metering on the SH29A Barkes Corner roundabout to help improve traffic flow.

From mid-December 2018, traffic lights will be operating on two sections of the SH29A Barkes Corner roundabout: for traffic approaching on Pyes Pa Road and westbound traffic on SH29A. The traffic lights will have amber and red lights - no green.

The traffic lights on SH29A will be phased to ease queues on Pyes Pa Road when it is busy - predominantly during the weekday morning peak. The traffic lights on Pyes Pa Road will be phased to improve traffic flow on SH29A from Tauriko during the weekday evening peak.

The lights will only operate when traffic queues activate the metering. When this happens, the lights will turn amber then red to stop the vehicles, allowing traffic from the busiest road to enter the roundabout.

Give way rules still apply when entering the roundabout.

AMBER

Prepare to stop. Give way rules apply at roundabout.

RED

Stop until red light turns off.

NO LIGHTS

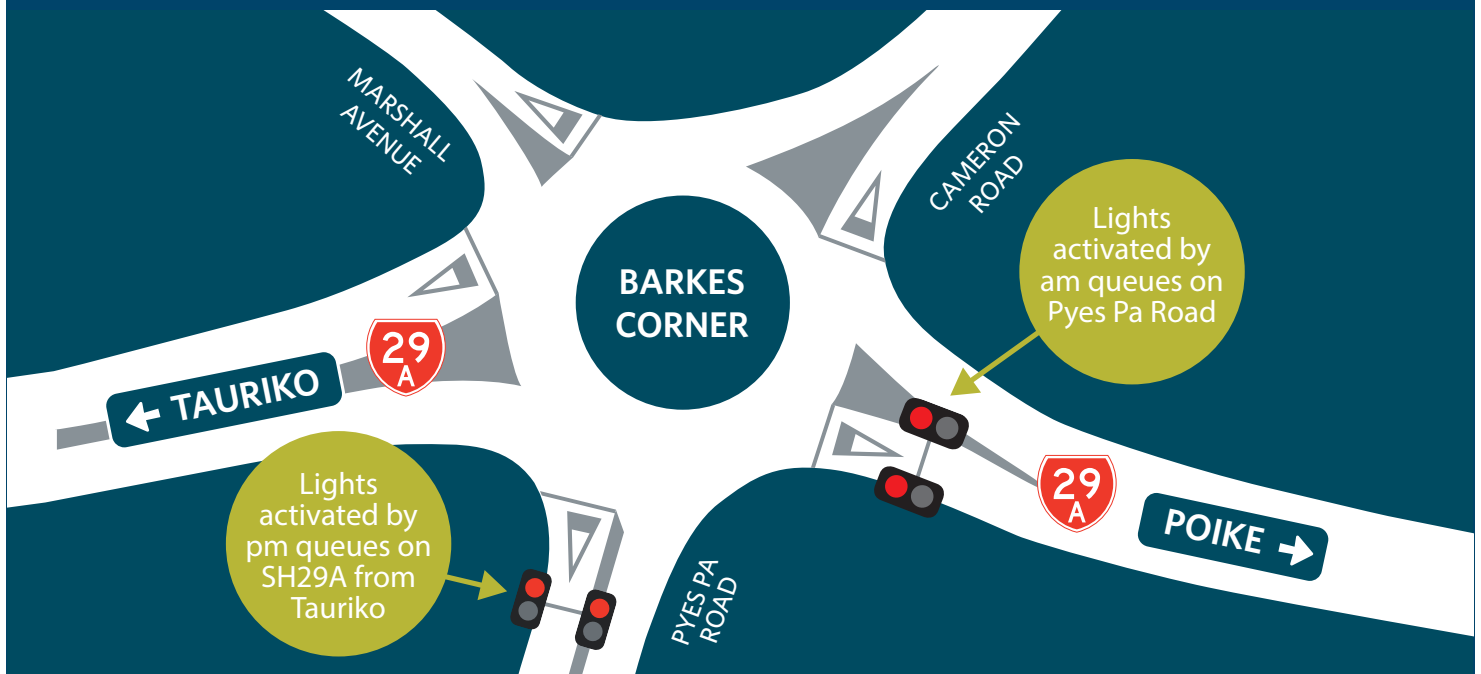

Proceed to roundabout. Give way rules apply.

Standard give way rules still apply entering the roundabout

The traffic lights do not mean that the roundabout is signalised like the Maungatapu roundabout (SH29A).
