

1 Resource consent application

This form asks for general information about your resource consent application such as contact details, consents required, and consultation details (including written approval of affected parties). You will also need to fill out an activity form(s) which explains your proposed activity (see page 3).

To help guide you to complete your application, please use our information brochures explaining the consent process, and follow the explanatory notes located in the forms for the specific activity you want to carry out.

The Resource Management Act 1991 (RMA) sets out the information you must provide with your application for a resource consent. If you provide inadequate information, we will not be able to process your application and may return it to you. If you are unsure what information should be provided with your application, or which forms to use, please contact us before lodging your application with us.

Please answer all the questions in this form and any additional forms required to be filled out fully. It is generally quicker and cheaper to process your application if you have discussed it with one of Greater Wellington’s resource advisors before you fill in this form. Please supply two copies of your entire application – one bound and one unbound.

Wellington office contact details: 04 384 5708 or at 142 Wakefield Street, PO Box 11646, Wellington 6142

Masterton office contact details: 06 378 2484 or at 34 Chapel Street, PO Box 41, Masterton 5840

Fees

Application fees for consent applications are explained in the Fees Schedule. Your application will not be processed until payment has been received. If you wish to pay by bank deposit please contact our Environment Help Desk for account details. Please note that the actual and reasonable cost to process your application may be more than the application fee. Also, if you withdraw your application you will still need to pay the actual and reasonable processing costs up to the time your application was withdrawn. If your application is granted then you will be required to pay an annual fee to cover the reasonable costs of monitoring and administering your resource consent

Checklist

Have you remembered to:	Yes	No
• Include an appropriate assessment of the effects of the activity, as set out in the relevant activity application form?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
• Obtain written approval from all affected parties (for non-notified applications)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
• Pay the application fee?	<input type="checkbox"/>	<input type="checkbox"/>
• Include activity application forms for each box ticked on page 3?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
• Sign and date the application form on page 2?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
• Include two copies of your application – one bound and one unbound	<input type="checkbox"/>	<input type="checkbox"/>

For office use only

\$ paid _____ Date: _____ Consent No: _____

Paid by: Cheque Eftpos Bank deposit Replacement application: Yes No

Receipt # _____ Previous Consent No: _____

Debtor # _____

Note: All information provided in your application is available to the public.

Contact details

Applicant(s) name(s) and address [i.e., whose name will be on the consent. Note if a private or family trust is the applicant, all the trustees are required to provide contact details and sign the application form]

Porirua City Council
T: Business: _____ T: Private: _____
Fax: _____ T: Mobile: _____
Email address: _____

Signature of applicant(s):  Date: 6 August 2011

Name [block capitals]: Gary Simpson, Chief Executive Officer, Porirua City Council

I hereby certify that, to the best of my knowledge and belief, the information given in this application is true and correct and I am authorised to sign this application form. I undertake to pay all actual and reasonable application costs incurred by Greater Wellington, which may be more than the deposit fee.

Service name and address (if different from above) [for contact during the application process]

Greg Lee, NZ Transport Agency
PO Box 5084
Wellington 6145
T: Business: 04 931 8906 T: Private: _____
Fax: 04 894 3305 T: Mobile: 64 21 240 4388
Email address: greg.lee@nzta.govt.nz

Billing name and address [for invoices and annual charges]

N/A
T: Business: _____ T: Private: _____
Fax: _____ T: Mobile: _____
Email address: _____

Property owner's name (if different from above)

N/A
T: Business: _____ T: Private: _____
Fax: _____ T: Mobile: _____
Email address: _____

If your proposed activity will take place on land not owned by the applicant, the written approval of the property owner is required below.

Signature of property owner _____ Date: _____

Name [block capitals]: _____

Where the activity is

Describe the location of activity and/or property address

Refer to the Plan Set (Volume 4) _____ Map reference: NZMS 260: _____
Valuation reference [from rates]: _____

Include the name of any relevant stream, river or other waterbody to which the application may relate, proximity to any well known landmark, etc. (Note: A location map is required in your activity form.)

Legal description [from rates notice]

Consents from Greater Wellington – activity forms you need to fill in

Consent(s) being applied for. You will need to fill in an activity form for each of the following activities: Make sure you attach the forms for your activity

Water:

Dam/Divert (Form 2a)	<input type="checkbox"/>	Take surface water (Form 2b)	<input type="checkbox"/>
Take and use groundwater (Form 2c)	<input type="checkbox"/>		

Discharge to Land:

General discharges (Form 3a)	<input checked="" type="checkbox"/>	Agricultural discharge (Form 3b)	<input type="checkbox"/>
On-site wastewater (Form 3c)	<input type="checkbox"/>		

Discharge to Water:

General discharges (Form 4a)	<input checked="" type="checkbox"/>	Earthworks (Form 4b)	<input type="checkbox"/>
------------------------------	-------------------------------------	----------------------	--------------------------

Discharge to Air:

Air discharge (Form 5a)	<input type="checkbox"/>
-------------------------	--------------------------

Land Use:

General river/stream works (Form 6a)	<input checked="" type="checkbox"/>	Bore/well construction (Form 6b)	<input type="checkbox"/>
Bridge construction (Form 6c)	<input checked="" type="checkbox"/>	Culvert construction (Form 6d)	<input checked="" type="checkbox"/>
Land clearing/tracking/logging/ soil disturbance (Form 6e)	<input checked="" type="checkbox"/>		

Coastal:

General coastal Form 7a)	<input type="checkbox"/>	Boatshed (Form 7b)	<input type="checkbox"/>
Swing mooring (Form 7c)	<input type="checkbox"/>	Occupation (Form 7d)	<input type="checkbox"/>

Consents from local authorities

Territorial authority in which land is situated:

Wellington City Council	<input type="checkbox"/>	Kapiti Coast District Council	<input type="checkbox"/>
Hutt City Council	<input type="checkbox"/>	Masterton District Council	<input type="checkbox"/>
Upper Hutt City Council	<input type="checkbox"/>	South Wairarapa District Council	<input type="checkbox"/>
Porirua City Council	<input checked="" type="checkbox"/>	Carterton District Council	<input type="checkbox"/>

Do you require any other resource consents from your local council? Yes No

If yes, please list: Two notices for the construction, operation and maintenance of the Porirua Link Roads.

Have these consents been applied for? Yes No

Other documentation

Please list any other documents in addition to your application forms that form part of your application. Note: if multiple other documents exist, please attach a separate sheet of paper.

No other documents

Reports

Title: AEE report (Volume 1), Technical Reports (Volume 3),

Plans

Plan Set (Volume 4), Draft management plans (Volume 5).

Other documents

Consultation and written approval of affected parties

Consultation with all parties potentially affected by your activity prior to lodging your application may result in considerable time and cost savings.

Non-notified applications

Non-notified consents are for activities which have minor effects on the environment. For your activity to be considered on a non-notified basis you must consult and obtain written approval from all parties potentially affected by your activity (eg, neighbours, iwi, Fish and Game Council, Department of Conservation). If you are unsure who may be an affected party, please call us. ***Non-notified consents are significantly cheaper and quicker to process.***

Limited notified and fully notified applications

Notified consents (either limited notified or fully notified consents) are for activities which do not meet requirements in the RMA for processing on a non-notified basis.

Please provide any consultation details and written approvals obtained in the space provided below.

Consultation details

Have you consulted with iwi? Yes No

If so, who did you consult? Refer to Part F of the AEE report (Volume 1), and Technical Report 22,

Who else have you consulted and what was their response? _____ (Volume 3).

Refer to Part F of the AEE report (Volume 1)

How have you addressed any concerns they may have had? _____

Refer to Part F of the AEE report (Volume 1)

Written approval of affected parties

I/we have read this consent application and supporting documents, and have no objection to the applicant's proposal. (Please note: Greater Wellington cannot consider effects on affected parties once written approval is provided. Please make sure you incorporate into your application any modifications the affected parties have requested in signing your application).

(1) Name: _____ Owner Occupier

Address: _____

T/fax/email: _____

Signature: _____ Date: _____

3a Discharge permit application - general discharges to land

Please answer all questions fully. Officers from Greater Wellington's Environmental Regulation department are available to assist with filling out this form or to clarify information to include with your application.

This form is required to be filled out in conjunction with Form 1 Resource Consent Application

Part A: General information on nature and scale of your activity

1. **What is the source of the contaminant(s): eg, Industry, solid agrichemical (1080), cleanfill, landfill, winery wastewater, composting animal wastes, breweries, oil etc:**

Discharge of chemically treated sediment laden water from erosion and sediment control devices to land.

2. **Provide a detailed description of contaminant characteristics, physical and chemical composition, and whether it is a classified hazardous substance:**

Refer to Chapter 9 of Technical Report 15 (Volume 3).

3. **Is the waste treated before discharge?**

Yes No If Yes, describe treatment:

Refer to Chapter 9 of Technical Report 15 (Volume 3).

4. **Describe discharge method, period, volume and rate of discharge – include calculations:**

Refer to Chapter 9 of Technical Report 15 (Volume 3).

For question 5 below, refer to plans DR01-21, S8EMP/C1-6, S8EMP/D1-6 and S8EMP/F6-12 (Volume 4).

5. Locality map and system design

Show the location of your proposed discharge and a detailed sketch/plan of the treatment/discharge system and discharge area. Please show the discharge area and any treatment system in relation to roads, property boundaries, waterways, bores, and the nearest town. Include an estimate of the size of the area to be irrigated (if applicable), the location of any buildings, septic tanks, location of any neighbouring bores/wells, other known abstraction points, freshwater springs, streams, rivers, wetlands that you know of and any other relevant features of the surrounding environment. Alternatively you may wish to attach a plan/aerial photograph showing the above information.

Note: Remember to show where north is.

Part B: Assessment of effects on the environment (AEE)

If your proposed discharge is likely to have a significant impact on the environment you will need to complete a more detailed environmental assessment in accordance with the Fourth Schedule of the Resource Management Act 1991.

1. Describe soil type(s) in the discharge area(s) and the source of this information (eg, soil maps, soil tests, local knowledge):

Refer to Chapter 3 of Technical Report 14 (Volume 3).

2. What is the depth to groundwater at the discharge site(s) (and the direction of groundwater flow if known)?

Refer to Chapter 5 of Technical Report 3 (Volume 3).

3. What is the land drainage like in the discharge area(s)? Is the soil artificially drained?

Refer to Chapter 3 of Technical Report 14 (Volume 3).

4. How far is the nearest surface water to the discharge area(s) and in what direction (eg, 50m NE)?

Refer to plans GA01-08 (Volume 4).

5. Are there any bores in vicinity (including neighbouring properties) and what are they used for?

Yes No

If Yes, show them on the locality map and describe their use below:

6. Are there any sensitive environments close to the discharge area? eg, wetlands, recreational areas

Yes No

If Yes, show them on the locality map and describe them below:

7. What effects will your discharge have on the sensitive environments identified above?

Not applicable.

8. Why did you choose the proposed method of treatment and disposal, including the proposed discharge location?

Refer to Chapter 9 and Appendices 15.L, 15.M, 15.N and 15.O of Technical Report 15 (Volume 3).

9. What alternative methods and locations have you considered?

Refer to Chapter 9 of the AEE report (Volume 1).

Part C: Monitoring and management of your activity

1. What monitoring and management do you propose to ensure any potential adverse effects on the environment are avoided, remedied or mitigated?

(In particular, please provide a description and analysis of contaminant effects on soil and water and any proposed monitoring to ensure that the discharge does not adversely effect soil or water resources. Include details on what is to be monitored, when, how and why.)

Refer to Part H of the AEE report (Volume 1), the draft Construction Environmental Management Plan (Volume 5) and the draft Ecological Management and Monitoring Plan (Volume 5).

Also refer to Appendix 15.L of Technical Report 15 (Volume 3).

2. Operation and management plans

Please include an Operation and Management Plan for the activity. This should include (but not be limited to) how the equipment controlling the treatment and discharge will be operated and maintained to prevent equipment failure (eg, maintenance/servicing schedules), and what measures will be implemented to ensure that the effects of any malfunction are remedied. It should also include contingency plans (eg, effluent storage) in the event of a system malfunction or adverse weather/soil conditions preventing effluent disposal to land (eg, saturated soils).

Refer to Part H of the AEE report (Volume 1) and the draft Construction Environmental Management Plan (Volume 5).

4a Discharge permit application – general discharge to water

Please answer all questions fully. Officers from Greater Wellington’s Environmental Regulation department are available to assist with filling out this form or to clarify information to include with your application.

This form is required to be filled out in conjunction with Form 1 Resource Consent Application

This application form should be used for all discharges to water, including discharge to coastal water below mean high water springs and within the outer limits of the territorial sea.

Part A: General information on nature and scale of your activity

1. What is/are the contaminant(s) of concern in the discharge?

(A contaminant is any substance which is likely to change the water into which it is discharged in any way. Water can also be a contaminant)

Discharge of chemically treated sediment laden water from erosion and sediment control devices for the Porirua Link Roads

2. What is the source of the contaminant and/or process that results in the discharge? (eg, municipal wastewater, industry, water treatment, rural activity/agricultural production - cows, pigs, poultry, contaminated stormwater, other) Note: If the source is from bulk earthworks please fill out Form 3b.

Bulk earthworks required for construction of the aforementioned.

3. If from municipal wastewater what is the current and future size of the population the treatment plant will serve, and what is the proposed operational life of the treatment plant and associated pipework?

Not applicable.

4 Is the contaminant treated in any way before being discharged? Yes No

5. Name the treatment system and describe the treatment process (include the design specifications such as the capacity of the system):

Refer to Chapter 9 of Technical Report 15 (Volume 3).

6. If sludge/solid waste is generated as part of the treatment process, please state what happens to this sludge. (Note: an additional consent will be required for the discharge of sludge to land).

Not applicable.

7. Describe the contaminant and expected quality of the discharge after treatment but before it enters its receiving environment:

Please provide the results from any water quality testing of the discharge. If you do not have this information, you will need to test your discharge. Indicate which contaminants have been identified in the discharge by ticking the box(es). Explain how the samples were taken (eg, spot sample or composite sample) and attach the sampling results (laboratory analytical certificates) to this application.

- | | |
|--|---|
| <input type="checkbox"/> Temperature °C | <input type="checkbox"/> pH |
| <input type="checkbox"/> Suspended solids g/m ³ | <input type="checkbox"/> BOD ₅ g/m ³ |
| <input type="checkbox"/> Faecal coliforms cfu/100 mL | <input type="checkbox"/> Heavy metals g/m ³ |
| <input type="checkbox"/> Toxic substances (eg, PAHs, phenols) g/m ³ | <input type="checkbox"/> Dissolved and total nutrients g/m ³ |
| <input type="checkbox"/> Ammonia g/m ³ : | <input type="checkbox"/> Oil/grease g/m ³ |

Date(s) sample taken: _____ Name of sampler: _____

Location(s) sample taken: _____

Date(s) of analysis: _____ Analysis conducted by: _____

Indicate the sampling area(s) on the locality map (question 20).

Where appropriate describe the following:

Physical characteristics of the discharge (such as temperature, suspended solids, turbidity)

For question 7, refer to Chapters 9 and 10 of Technical Report 15 (Volume 3).

Inorganic chemical characteristics of the discharge (such as pH, free ammonia, organic nitrogen, total kjeldahl nitrogen, nitrites, nitrates, inorganic phosphorus, sulphate, metals)

Organic chemical characteristics of the discharge (such as BOD₅, VOC's)

Biological characteristics of the discharge (such as faecal coliforms, specific micro-organisms, toxicity)

8. What is the name of the waterbody into which the discharge will be made (eg, name of stream, river, lake, bay, harbour, catchment, etc)?

Duck Creek and tributaries.

9. Describe the present state of the waterbody at the proposed location of the discharge.

Parameters to include in your description are flow information, water colour/clarity, width of channel, average depth, land use surrounding the waterbody, bed material (eg, rocky, silty, etc), bank material, streamside vegetation, erosion, fish life, invertebrate life, aquatic plants.

Refer to Chapter 5 of Technical Report 15 (Volume 3).

Greater Wellington's Environmental Monitoring and Investigations department may be able to assist you with flow or water quality data if you have no information. Please note some applications may require a professional ecological assessment.

10. What is the quality of the receiving waterbody before the discharge? Provide sample results and interpretation of these results (eg, against guideline values).

Refer to Chapter 6 of Technical Report 15 (Volume 3).

11. Provide details of the expected quality of the receiving waters (AFTER the point of discharge, at a point after reasonable mixing). Provide sample results for existing discharges or provide anticipated results.

For question 11, refer to Chapter 11 of Technical Report 15 (Volume 3).

Indicate which contaminants have been identified in the receiving waters by ticking the box(es). Attach the sampling results (laboratory analytical certificates) to this application

- Temperature °C
- Suspended solids g/m³
- Faecal coliforms cfu/100 mL
- Toxic substances
- Ammonia and dissolved reactive phosphorus
- pH
- BOD₅ g/m³
- Heavy metals
- Nitrates
- Dissolved Oxygen g/m³

Date(s) sample taken: _____ Name of sampler: _____

Location(s) sample taken: _____

Date(s) of analysis: _____ Analysis conducted by: _____

Please indicate the sampling locations (i.e. upstream, downstream, point of discharge) on the locality map (question 20)

12. Describe the method of discharge. Describe what measures will be put in place to prevent erosion or scour at the point of discharge.

Refer to draft Site Specific Environmental Management Plans 4 and 5 (Volume 5) as well as plans SSEMP E1-5 and SSEMP Typical Details (Volume 4).

13. Describe the discharge outlet structure (eg, 300mm pipe, multi-port diffuser, gravel trench etc.)

Refer to draft SSEMP Typical Details (Volume 4).

For questions 15 and 16, refer to Chapter 6 of Technical Report 14 (Volume 3).

14. Is the discharge continuous or intermittent ?

15. What will be the maximum discharging period?

_____ hours per day

_____ days per week

_____ weeks per year

16. Describe the expected volume and frequency of the discharge?

Maximum flow rate _____ litres per second

Maximum daily discharge _____ cubic metres per day

Average Dry Weather Flow _____

Peak Wet Weather Flow _____

Max. Volume per annum _____

17. Does the discharge also involve:	Outlet structure?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
	Diversion?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
	Discharge to air (odour)?	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
	Discharge to land?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>

If you answered yes to any of 17 above, a separate consent application may be required. Give details of these other discharges below unless separate consent applications forms have been completed (in order to assess if further consents are required):

18. Is there any odour associated with the discharge?

No.

19. Give details of other discharge(s) occurring to the waterbody (eg, wet weather overflows).

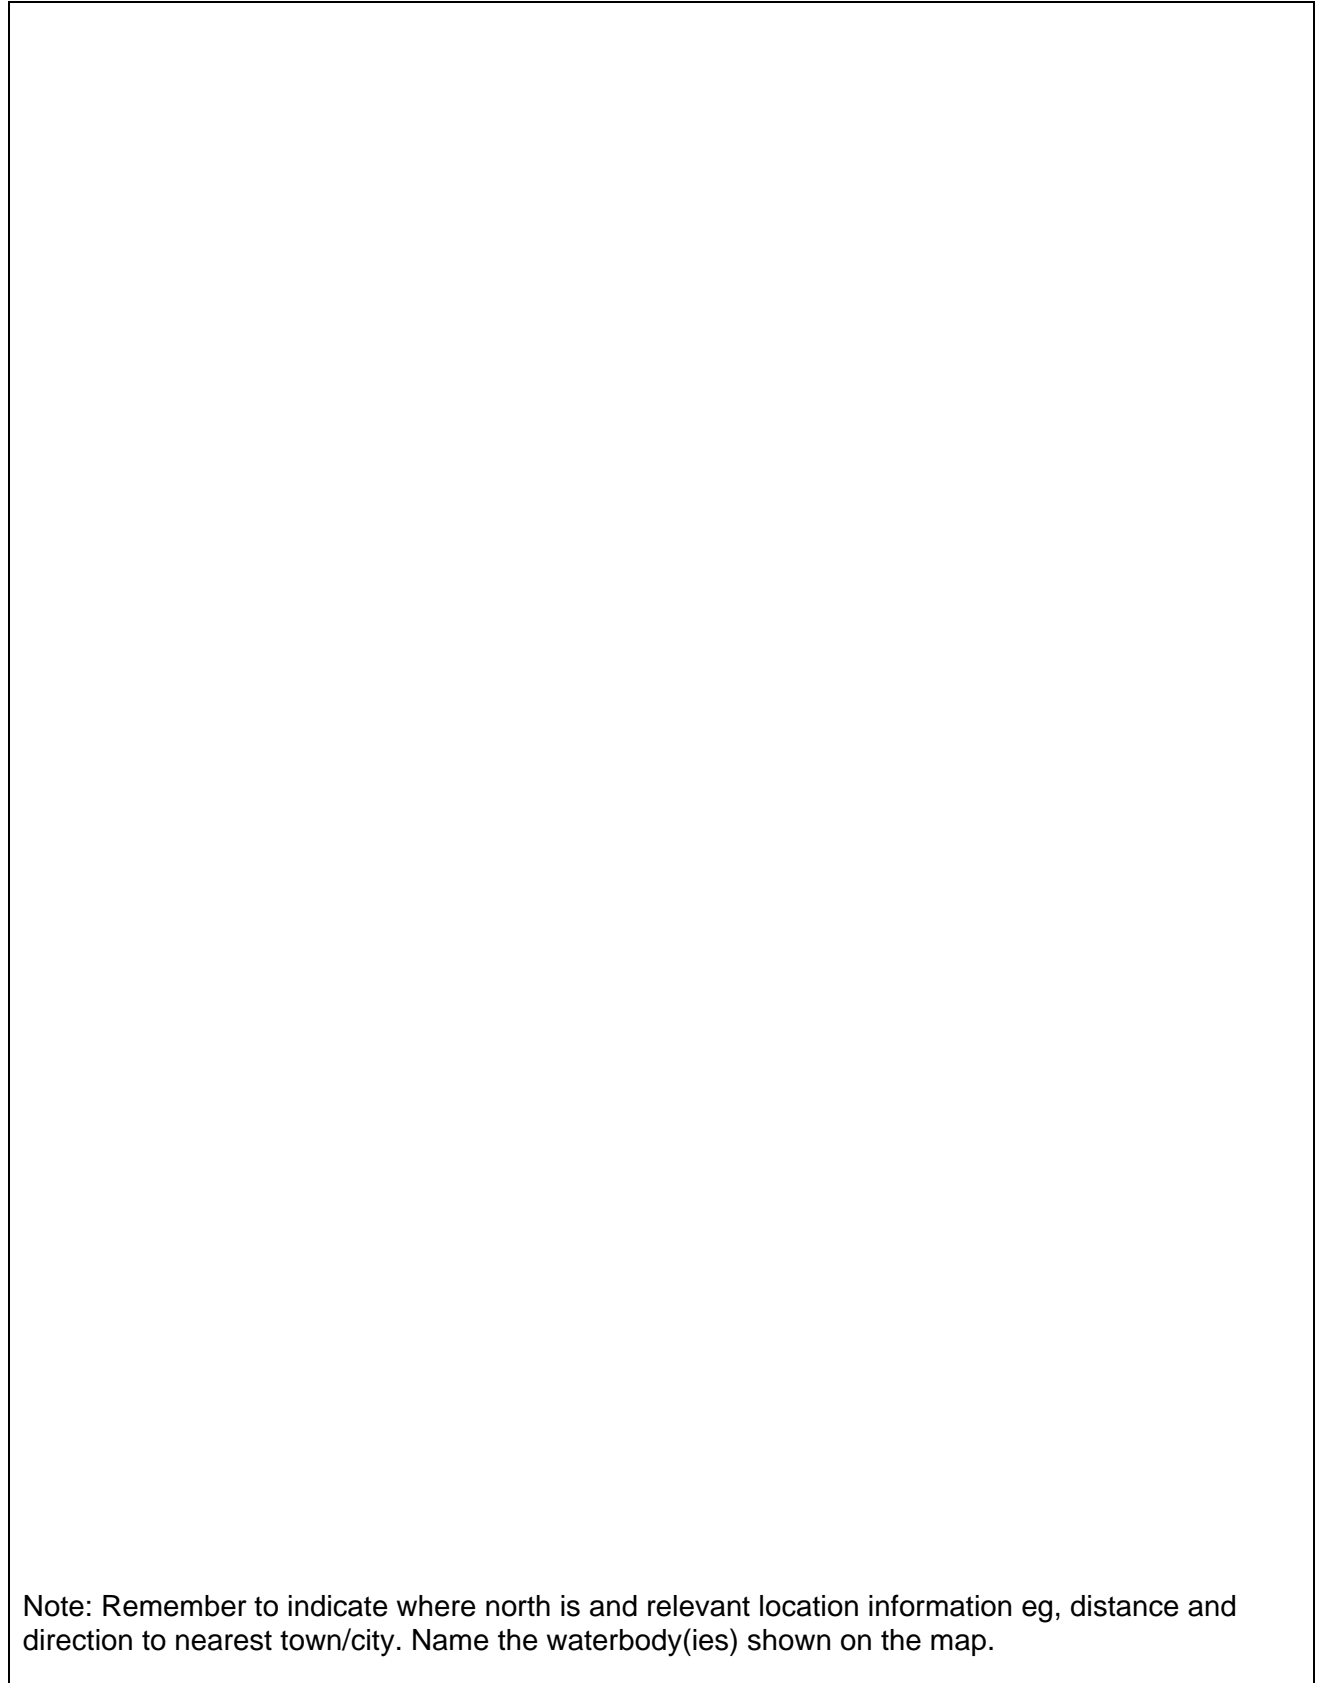

Describe the location, activity and source of these discharge(s) and any other details you are able to provide:

Refer to plans DR14 and DR15 (Volume 4) and Chapter 6 of Technical Report 14 (Volume 3).

For question 20, refer to plans DR14 and DR15 (Volume 4) for locations of proposed sediment ponds.

20. Locality map and system design

Show the location of your proposed discharge. The sketch or plan should include, but not be limited to discharge point(s), sampling locations, location of neighbouring properties, roads, waterbodies (including streams, wetlands and drains), and other significant landmarks. Alternatively you may wish to attach a plan/aerial photograph showing the above information.

Note: Remember to indicate where north is and relevant location information eg, distance and direction to nearest town/city. Name the waterbody(ies) shown on the map.

Part B: Assessment of effects on the environment (AEE)

If your proposed discharge is likely to have a significant impact on the environment you will need to complete a more detailed environmental assessment in accordance with the Fourth Schedule of the Resource Management Act 1991.

1. Within a reasonable distance downstream or in the vicinity of the discharge are there any:

- (1) Obvious indications of the presence of biota (eg, birds/nests, fish, eels, insect life, aquatic plants)? Yes No
- (2) Areas where food is gathered (eg, watercress, fish, kaimoana, blackberries)? Yes No
- (3) Water abstractions? Yes No
- (4) Wetlands (eg, swamp areas)? Yes No
- (5) Recreational activities carried out (eg, swimming, fishing, canoeing)? Yes No
- (6) Areas of particular aesthetic or scientific value (eg, archaeological sites)? Yes No
- (7) Areas or aspects of significance to iwi that you are aware of? Yes No

2. If you have answered yes to any of the above, please provide further information, including the distance of these activities from your proposed discharge point(s) and a description of what effects the discharge may have on them.

Refer to Part G of the AEE report (Volume 1).

3. What steps do you propose to take to mitigate these effects?

Refer to Part H of the AEE report (Volume 1)

[Continue on a separate page if necessary]

4. What is the management purpose of the receiving waters as described in the Regional Freshwater Plan or Regional Coastal Plan?

Refer to Chapter 6 of Technical Report 15 (Volume 3).

5. What do you consider are the likely effects of the discharge upon the receiving waters, particularly in relation to the management purpose in question 4 above?

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

6. **If there any other discharges within the same catchment, what is the combined effect of these discharges (including the proposed discharge) on the receiving environment?**

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

7. **What is the length and width of the proposed zone of non-compliance (if any) to allow for reasonable mixing of the discharge in the receiving waters? How were the dimensions of this zone determined and what degree of dilution (eg, 100:1) is provided by the end of the zone?**
Note: In some waterbodies it may not be reasonable to have a non-compliance zone.

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

8. **Describe any noticeable change in the colour/clarity of the receiving waters that may result from the discharge:**

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

9. **What environmental effects were considered when choosing the proposed method of disposal and location (eg, water table, dilution rates/mixing potential, proximity to waterbody)?**

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

10. **What alternative methods of treatment and disposal/discharge locations were considered?**

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

11. **Were these alternatives discounted?**

For questions 5 to 11, refer to Technical Report 15 (Volume 3).

Part C: Monitoring and management of your activity

1. **What monitoring and management do you propose to ensure any potential adverse effects on the environment are avoided, remedied or mitigated?** (eg, discharge monitoring, receiving water monitoring, ecological surveys, toxicity tests). Include details on what is to be monitored, when, how, and why.

Refer to Part H of the AEE report (Volume 1). Further detail is also provided in Appendix 15.L of Technical Report 15 (Volume 3).

2. **What contingency measures are proposed to deal with any system malfunction or failures so as to prevent unauthorised, uncontrolled, or only partially treated discharge to the environment?**

Refer to the draft CEMP (Volume 5).

3. **Describe how the equipment controlling the discharge to prevent equipment failure will be maintained and operated** (eg, measures to exclude stormwater from the system, desludging, equipment maintenance).

Refer to the draft CEMP (Volume 5).

4. **What will be done to minimise and remediate any effects in the event of equipment failure?**

Refer to the draft CEMP (Volume 5).

6a Land use consent application for works in or on the beds of lakes and rivers

You should use this form for activities in or on the beds of lakes or rivers.

Please answer all questions fully. You should discuss your application with one of Greater Wellington's resource advisors before completing this form.

Show the location of the activity and adjoining properties on your map on Form 1. Include design plans and details with this application as appropriate.

Part A: general

1. What do you propose to do and why?

Refer to Chapters 7 and 8 of the AEE report (Volume 1) for a description of the proposed activity.

Refer to Chapter 2 for the reasons why the activity is proposed.

2. Are you:

- | | | |
|--|---|--|
| (1) Erecting, reconstructing, placing, altering, extending, removing or demolishing any structure? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (2) Excavating, drilling, tunnelling or disturbing the bed? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (3) Depositing any substance? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (4) Reclaiming or draining the bed? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (5) Introducing or planting any plants? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (6) Disturbing, removing, damaging or destroying any plants, or the habitats or any plants or animals? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (7) Crossing a watercourse? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |

3. (1) Describe how establishing the activity (ie, construction) will affect the stream, lake or riverbed:

Refer to Chapter 8 of the AEE report (Volume 1) and plans DR01-21 (Volume 4).

(2) Describe how the completed work will affect the stream, lake or riverbed:

Refer to Chapter 7 of the AEE report (Volume 1) and plans DR01-21 (Volume 4).

4. What is the proposed commencement date of the work? 2014

5. What is the proposed completion date? 2021

Part A: general (continued)

6. Describe how the work will be carried out:

Refer to Chapter 8 of the AEE report (Volume 1) and the draft SSEMPs 1-6 (Volume 5).

7. Will the work be completed in stages?

Yes No

If so, in what stages?

Refer to Chapter 8 of the AEE Report (Volume 1).

8. Is the work permanent or temporary ?

9. Who will be undertaking the work? A contractor appointed by the NZ Transport Agency.

10. What are the proposed hours of operation/construction? Determined through the management plan

Part B: assessment of effects on the environment

Where your activity could have a significant adverse effect on the environment a more detailed environmental assessment is required in accordance with the Fourth Schedule of the Resource Management Act 1991. A resource advisor can discuss this with you.

1. What is the name of the watercourse or natural water on which the works will take place?

Duck Creek. For question 2 below, refer to plans DR14 and DR15 (Volume 4).

2. What is the area of land involved? _____ hectares

3. Are there any alternative locations or methods for carrying out the work?

Yes No

(1) If yes, where or how?

Refer to Chapter 9 of the AEE report (Volume 1) for questions 3(1) and 3(2).

(2) Why have you chosen this location or method over the others?

Part B: assessment of effects on the environment (continued)

4. Within a reasonable distance of the activity are there any:

- | | | |
|--|---|--|
| (1) Obvious signs of biota (eg, fish, eels, insect life, aquatic plants)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (2) Areas where food is gathered (eg, fish, kaimoana)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (3) Wetlands (eg, swamp areas)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (4) Waste discharges (eg, from rural sources, industries, sewage plants)? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (5) Recreational activities carried out (eg, swimming, fishing, canoeing, boating)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (6) Areas of particular aesthetic or scientific value (eg, scenic waterfalls, rapids, archaeological sites)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (7) Will the proposed activity disturb plants on land? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (8) Will hazardous or toxic chemicals be used or stored on site (eg, fuel)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (9) Will the water quality be affected? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (10) Will access to the lake or river be affected? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (11) Will the flow of the lake or river be affected? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (12) Areas or aspects of significance to iwi that you are aware of? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (13) Will the proposed activity increase the risk of flooding? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |

5. Describe the plants, animals and habitat of the surrounding area:

Terrestrial ecology: Chapter 21 of the AEE report (Volume 1).

Freshwater ecology: Chapter 22 of the AEE report (Volume 1).

Marine ecology: Chapter 23 of the AEE report (Volume 1).

6. If you have answered yes to any of the above, describe what effects your proposed land use consent may have and the steps you propose to take to mitigate these:

Terrestrial ecology: Chapter 21 of the AEE report (Volume 1).

Freshwater ecology: Chapter 22 of the AEE report (Volume 1).

Marine ecology: Chapter 23 of the AEE report (Volume 1).

Refer to Part H of the AEE report (Volume 1) for proposed mitigation.

[Continue on a separate page if necessary]

7. Do you propose to undertake any type of monitoring? Yes No

If yes, what? Refer to the draft Ecological Management and Monitoring Plan (Volume 5).

For office use only

Consent No. _____

Renewal: Yes No

6c Bridge design information

The following information is required to accompany resource consent applications for bridges or culverts on waterways. Please answer all questions if possible. If you do not know the exact answer(s) an approximate answer will do.

You may wish to discuss the data requirements with one of Greater Wellington's resource advisors.

Please attach any other useful information, calculations, plans or descriptions.

1. Give a full description of why the works are to be constructed:

Refer to Part A of the AEE report (Volume 1).

For questions 2 and 3 below, refer to Chapter 6, Appendices 14.A, 14.B, 14.C and 14.D of Technical Report 14

(Volume 3).

2. **Catchment area**

- (1) What is the area of the catchment above the site of the proposed bridge/culvert?

_____ hectares

- (2) What is the topography (landform) of the area (eg, flat, gently rolling, mountainous)?

Refer to Plan GA-04 (Volume 4).

- (3) What is the shape of the catchment (eg, long, circular, oval, fan)? _____

- (4) What is the length from the site of the proposed bridge/culvert to the remotest point of the catchment?

_____ km

- (5) What is the soil type of the catchment (eg, clay, rock, loam, sand)? _____

- (6) What are the vegetation types that could produce debris? _____

3. **Design data**

- (1) Please complete at least one of the following methods of analysis and attach calculations. Results of flow frequency analysis should be used if available.

(a) Tech Memo 61 - use modified TM61 formula for catchments less than 25 km².

(b) Rational method - give estimated run-off coefficient "C" _____

(c) Regional flood estimation of Hydrology Centre Publication No. 20 Flood Frequency in New Zealand.

(2) What is the time of concentration (flow time from the furthest point of the catchment to the site?)

(3) What is the design rainfall? _____ mm/hour [not required for Publication No. 20.]

(4) What is the design discharge? _____ M³/s

What calculation method did you use? 1(a) 1(b) 1(c)

Other, specify _____

(5) What is the design discharge frequency (return period or annual exceedence probability)?

(6) Do you have any measured flows? Yes No

If yes, please attach showing date, discharge (m³/s), estimated frequency and method of measurement.

(7) What is the highest known flood level at the site? _____ m

(8) What was the estimated frequency for this flood event? _____ years

(9) What was the method for obtaining this flood level? _____

(10) Are there any other bridges or culverts nearby on the same channel? Yes No

If yes, give details: _____

(11) What is the velocity of design flood for the proposed structure? _____ m/s

(12) Are the flood levels affected by backwater effects? Yes No

Please describe: _____

[Continue on a separate page if necessary]

4. Channel data

Provide a representative cross section of the river/stream.

(1) How wide is the channel? _____ m

(2) What is the gradient at the site of the proposed bridge/culvert? 1 in _____

(3) Is the flood gradient different to the normal gradient? Yes No

If yes, what is the flood gradient? 1 in _____

(4) Are there any features likely to affect the normal and flood gradients of the channel or cause channel restrictions? Yes No

If yes, what are these features? _____

(5) Please describe the bed material type and size (eg, silt, gravel, coarse or fine):

For question 4, refer to Chapter 3 of Technical Report 14 (Volume 3).

(6) What is the estimated value of Manning's n upstream of the proposed culvert/bridge site?

5. Culverts

(1) What type of culvert do you propose to build (eg, pipe, box, arch)? _____

(2) What is the estimated design flood level and waterway area of the proposed structure?

Flood level: _____ m

Waterway area: _____ m²

(3) Are overflows anticipated from the culvert? Yes No

If yes, will the overflow return directly to the waterway? Yes No

If no, where will the overflow go? _____

(4) Does the design anticipate surcharge? Yes No

If yes, please describe the effects and identify affected parties (see Form 1):

For question 5, refer to Appendices 14.F and 14.G of Technical Report 14 (Volume 3).

(5) What is the length of the proposed culvert? _____ m

(6) What is the slope of the culvert? 1 in _____

(7) Do you have any inlet/outlet details? Yes No

If yes, please attach.

(8) What provision will you make to prevent overflow scour or approaches?

[Continue on a separate page if necessary]

(9) Will a stilling basin be used? Yes No

If yes, please give details: _____

(10) Is there flood protection downstream? Yes No

If yes, please describe: _____

(11) Will debris be collected upstream? Yes No

(12) What allowances have been made in the waterway for collected debris?

(13) Attach a stream cross section showing the culvert and associated filling.

6. Bridges

(1) What is the estimated design flood level and waterway area of the proposed structure? _____ m

(2) Will the bridge cause overflows upstream? Yes No

If yes, will the overflow return directly to the waterway? Yes No

If no, where will the overflow go? (Please identify any affected parties on Form 1.)

(3) What is the angle of river approach to the bridge? _____ degrees

(4) Could river meanders or erosion alter the approach angle? Yes No

(5) What is proposed as abutment protection? For question 6, refer to Chapter 7
of the AEE report)Volume 1 and plans S01-29 (Volume 4).

Attach details of any bank protection proposed for abutment.

(6) What is the depth of the scourable bed material? _____ m

(7) What is the maximum depth of scour for design flood? _____ m

(8) Will debris be collected upstream? Yes No

(9) What allowances have been made in the waterway for collected debris?

For (10) below, refer also to Plans S01-28 (Volume 4).

[Continue on a separate page if necessary]

(10) Attach a plan showing pier and abutment positions, span lengths, pier/pile founding level.

(11) Attach a waterway cross section.

For office use only

Consent No. _____

Renewal: Yes No

6d Culvert design information

The following information is required to accompany resource consent applications for bridges or culverts on waterways. Please answer all questions if possible. If you do not know the exact answer(s) an approximate answer will do.

You may wish to discuss the data requirements with one of Greater Wellington's resource advisors.

Please attach any other useful information, calculations, plans or descriptions.

1. Give a full description of why the works are to be constructed:

Refer to Chapter 2 of the AEE report (Volume 1).

For questions 2 and 3 below, refer to Technical Report 14 (Volume 3) and plans GA01-09.

2. **Catchment area**

- (1) What is the area of the catchment above the site of the proposed bridge/culvert?

_____ hectares

- (2) What is the topography (landform) of the area (eg, flat, gently rolling, mountainous)?

- (3) What is the shape of the catchment (eg, long, circular, oval, fan)? _____

- (4) What is the length from the site of the proposed bridge/culvert to the remotest point of the catchment?

_____ km

- (5) What is the soil type of the catchment (eg, clay, rock, loam, sand)? _____

- (6) What are the vegetation types that could produce debris? _____

3. **Design data**

- (1) Please complete at least one of the following methods of analysis and attach calculations. Results of flow frequency analysis should be used if available.

(a) Tech Memo 61 - use modified TM61 formula for catchments less than 25 km².

(b) Rational method - give estimated run-off coefficient "C" _____

(c) Regional flood estimation of Hydrology Centre Publication No. 20 Flood Frequency in New Zealand.

(2) What is the time of concentration (flow time from the furthest point of the catchment to the site?)

(3) What is the design rainfall? _____ mm/hour [not required for Publication No. 20.]

(4) What is the design discharge? _____ M³/s

What calculation method did you use? 1(a) 1(b) 1(c)

Other, specify _____

(5) What is the design discharge frequency (return period or annual exceedence probability)?

(6) Do you have any measured flows? Yes No

If yes, please attach showing date, discharge (m³/s), estimated frequency and method of measurement.

(7) What is the highest known flood level at the site? _____ m

(8) What was the estimated frequency for this flood event? _____ years

(9) What was the method for obtaining this flood level? _____

(10) Are there any other bridges or culverts nearby on the same channel? Yes No

If yes, give details: _____

(11) What is the velocity of design flood for the proposed structure? _____ m/s

(12) Are the flood levels affected by backwater effects? Yes No

Please describe: _____

[Continue on a separate page if necessary]

4. Channel data

Provide a representative cross section of the river/stream.

(1) How wide is the channel? _____ m

(2) What is the gradient at the site of the proposed bridge/culvert? 1 in _____

(3) Is the flood gradient different to the normal gradient? Yes No

If yes, what is the flood gradient? 1 in _____

(4) Are there any features likely to affect the normal and flood gradients of the channel or cause channel restrictions? Yes No

If yes, what are these features? _____

(5) Please describe the bed material type and size (eg, silt, gravel, coarse or fine):

For question 4 (1-6), refer to Appendix 14.F of Technical Report 14 (Volume 3).

(6) What is the estimated value of Manning's n upstream of the proposed culvert/bridge site?

5. Culverts

(1) What type of culvert do you propose to build (eg, pipe, box, arch)? _____

(2) What is the estimated design flood level and waterway area of the proposed structure?

Flood level: _____ m

Waterway area: _____ m²

(3) Are overflows anticipated from the culvert? Yes No

If yes, will the overflow return directly to the waterway? Yes No

If no, where will the overflow go? _____

(4) Does the design anticipate surcharge? Yes No

If yes, please describe the effects and identify affected parties (see Form 1):

For question 5 (1-13), refer to Chapter 5 and Appendix 14.G of Technical Report 14

(Volume 3).

(5) What is the length of the proposed culvert? _____ m

(6) What is the slope of the culvert? 1 in _____

(7) Do you have any inlet/outlet details? Yes No

If yes, please attach.

(8) What provision will you make to prevent overflow scour or approaches?

[Continue on a separate page if necessary]

(9) Will a stilling basin be used? Yes No

If yes, please give details: _____

(10) Is there flood protection downstream? Yes No

If yes, please describe: _____

(11) Will debris be collected upstream? Yes No

(12) What allowances have been made in the waterway for collected debris?

(13) Attach a stream cross section showing the culvert and associated filling.

6. Bridges

(1) What is the estimated design flood level and waterway area of the proposed structure? _____ m

(2) Will the bridge cause overflows upstream? Yes No

If yes, will the overflow return directly to the waterway? Yes No

If no, where will the overflow go? (Please identify any affected parties on Form 1.)

(3) What is the angle of river approach to the bridge? _____ degrees

(4) Could river meanders or erosion alter the approach angle? Yes No

(5) What is proposed as abutment protection? For question 6 (1-11), refer to Chapter 6 and Appendix 14.E of Technical Report 14 (Volume 3).

Attach details of any bank protection proposed for abutment.

(6) What is the depth of the scourable bed material? _____ m

(7) What is the maximum depth of scour for design flood? _____ m

(8) Will debris be collected upstream? Yes No

(9) What allowances have been made in the waterway for collected debris?

For (10) & (11) below, refer to Plans S01-28 (Volume 4)

[Continue on a separate page if necessary]

(10) Attach a plan showing pier and abutment positions, span lengths, pier/pile founding level.

(11) Attach a waterway cross section.

For office use only

Consent No. _____

Renewal: Yes No

6e Land use consent application for soil disturbance

You should use this form if you want to do something which involves soil disturbance. Soil disturbance means the disturbance of land surfaces by blading, blasting, contouring, cultivating, ripping, root-taking, moving, removing soil or earth, by excavation, or by cutting.

Please answer all questions fully. You should discuss your application with one of Greater Wellington's resource advisors before completing this form.

Please enclose a site plan on Form 1 of your application. This should include the area of proposed soil disturbance, any area of significant slope instability, stockpiles, cut and fill areas, property boundaries, neighbouring dwellings and watercourses (including names if known).

Part A: general

1. Please indicate the type of work to be carried out:

Soil disturbance of 500-2,000 m³

Soil disturbance of more than 2,000 m³

2. What is the reason for the soil disturbance?

Construction of the Porirua Link Roads.

3. What is the area involved? Plan GM01-21 hectares

4. What is the topography of the area (eg, gently rolling, steep, hilly, flat, etc)?

Refer to Plan GA-04 (Volume 4).

5. What is the estimated amount of soil to be disturbed? _____ m³ At what rate? N/A m³/yr

6. Please describe the material which is to be disturbed (include soil type, underlying rock, slope, vegetation cover):

Refer to Technical Report 3 (Volume 3) and plans GA-04 and 05 (Volume 4).

Part A: general (continued)

7. Is there a watercourse, dry or flowing, in the vicinity of the activity (include those within 50 m for flat land, and within 500 m for sloping land)? Yes No

If yes, please name and give approximate distance from the activity. Include details of steps you propose to take to ensure that no vegetation, soil, slash or other debris can enter the watercourse:

Refer to Chapter 9 of Technical Report 15 (Volume 3), and plans GA01-08 (Volume 4).

8. What is the proposed commencement date of the work? Refer to Chapter 8 of the AEE report (Volume 1).

9. What is the proposed completion date? Refer to Chapter 8 of the AEE report (Volume 1).

10. Please describe how the work will be carried out:

Refer to Chapter 8 of the AEE report (Volume 1).

11. Will the work be completed in stages (include the length of time it will take to complete each stage)? Yes No

If yes, in what stages?

Refer to Chapter 8 of the AEE report (Volume 1).

12. Is the work: permanent or temporary ?

13. Who will be undertaking the work? A contractor appointed by the NZ Transport Agency.

14. What are the proposed hours of operation/construction? _____

15. Describe any cut or fill batters, or both (include height, depth of excavation, slope and extent):

Refer to cross sections in plans GM35-84 (Volume 4).

16. Will you be stockpiling any material? Yes No

If yes, please describe the dimension, location and duration of stockpiles:

Indicative locations and dimensions of stockpiles of material are identified in plans AC01-21

(Volume 4).

Part B: assessment of effects on the environment

Where your activity could have a significant adverse effect on the environment a more detailed environmental assessment is required in accordance with the Fourth Schedule of the Resource Management Act 1991. A resource advisor can discuss this with you.

1. Are there any alternative locations or methods for carrying out the work? Yes No

(1) If yes, where or how?

Refer to Chapter 9 of the AEE report (Volume 1).

(2) Why have you chosen this location or method over the others?

Refer to Chapter 9 of the AEE report (Volume 1).

2. Within a reasonable distance of the activity are there any:

- | | | |
|---|---|--|
| (1) Obvious signs of biota (eg, fish, eels, insect life, aquatic plants)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (2) Areas where food is gathered (eg, fish, kaimoana)? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| (3) Wetlands (eg, swamp areas)? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (4) Waterbodies where quality may be affected? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (5) Areas or aspects of significance to iwi that you are aware of? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (6) Stormwater inlets? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| (7) Areas of slope instability (eg, slump, earth flow)? | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |

Describe the plants, animals and habitat of the surrounding area:

Refer to Technical Reports 6-10 (Ecology) and 18 (Culturally significant areas) (Volume 3).

If you have answered yes to any of the above, describe what effects your proposed land use consent may have and the steps you proposed to take to mitigate these:

Refer to Parts G and H of the AEE report (Volume 1).

[Continue on a separate page if necessary]

Part B: assessment of effects on the environment (continued)

3. Are you proposing sediment retention and/or sediment run-off control methods? Yes No

If yes, what?

Refer to Chapter 8 of the AEE report (Volume 1), Technical Report 15 (Volume 3) and plans

DR01-21 (Volume 4).

4. Are you proposing any land rehabilitation? Yes No

If yes, what?

Refer to plans LA01-21 (Volume 4).

5. Do you proposed to undertake any type of monitoring? Yes No

If yes, what?

Refer to Part H of the AEE report (Volume 1), Technical Report 15 (Volume 3) and the draft

Ecological Mitigation and Monitoring Plan (Volume 5).

For office use only

Consent No. _____

Renewal: Yes No
