

Getting to know TREC

We're rebuilding stronger highways and rail for thriving East Coast communities

Transport Rebuild East Coast

The Transport Rebuild East Coast (TREC) Alliance is a partnership between NZ Transport Agency Waka Kotahi (NZTA), KiwiRail, Downer, Fulton Hogan and Higgins.

TREC has been set up and teams are working hard and fast to create strong reconnections. For the recovery work more than 400 recovery sites were identified for repair and construction, over a hundred sites have been completed, other sites are being planned (design) or are in construction.

Working collaboratively with local businesses

We're working in partnership with a strong pool of hard-working, skilled and experienced local people, contractors and suppliers who understand the East Coast whenua. We will need more people on the ground, as well as others working around Aotearoa. While providing opportunities we're mindful of not taking critical roles away from other recovery organisations working to support communities.

Tūtahi, we are stronger together, for our recovery and upcoming rebuild work.

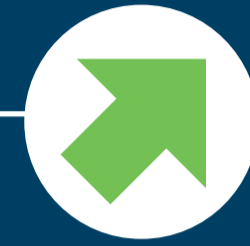

Mahi tahi - Rebuilding is a joint effort

We're working together with our Treaty partners, councils and local groups to share local people, machinery, resources and wisdom for the good of the East Coast.

Ngā mihi nui - Thanks for your support

TREC is on track. We're making good progress with recovery work and planning is well underway for possible rebuild solutions. Our journey is a long one - we appreciate your patience and we'll keep listening and responding to your feedback.

Thank you for your warm welcome

Thriving East Coast

We want communities to thrive both during and after the rebuild. There are lots of opportunities for jobs, training, local business growth and success.

Partnerships

Partnerships are about working together to achieve a shared vision. Iwi partnership and supporting the wider aspirations of the region is key to all TREC works.

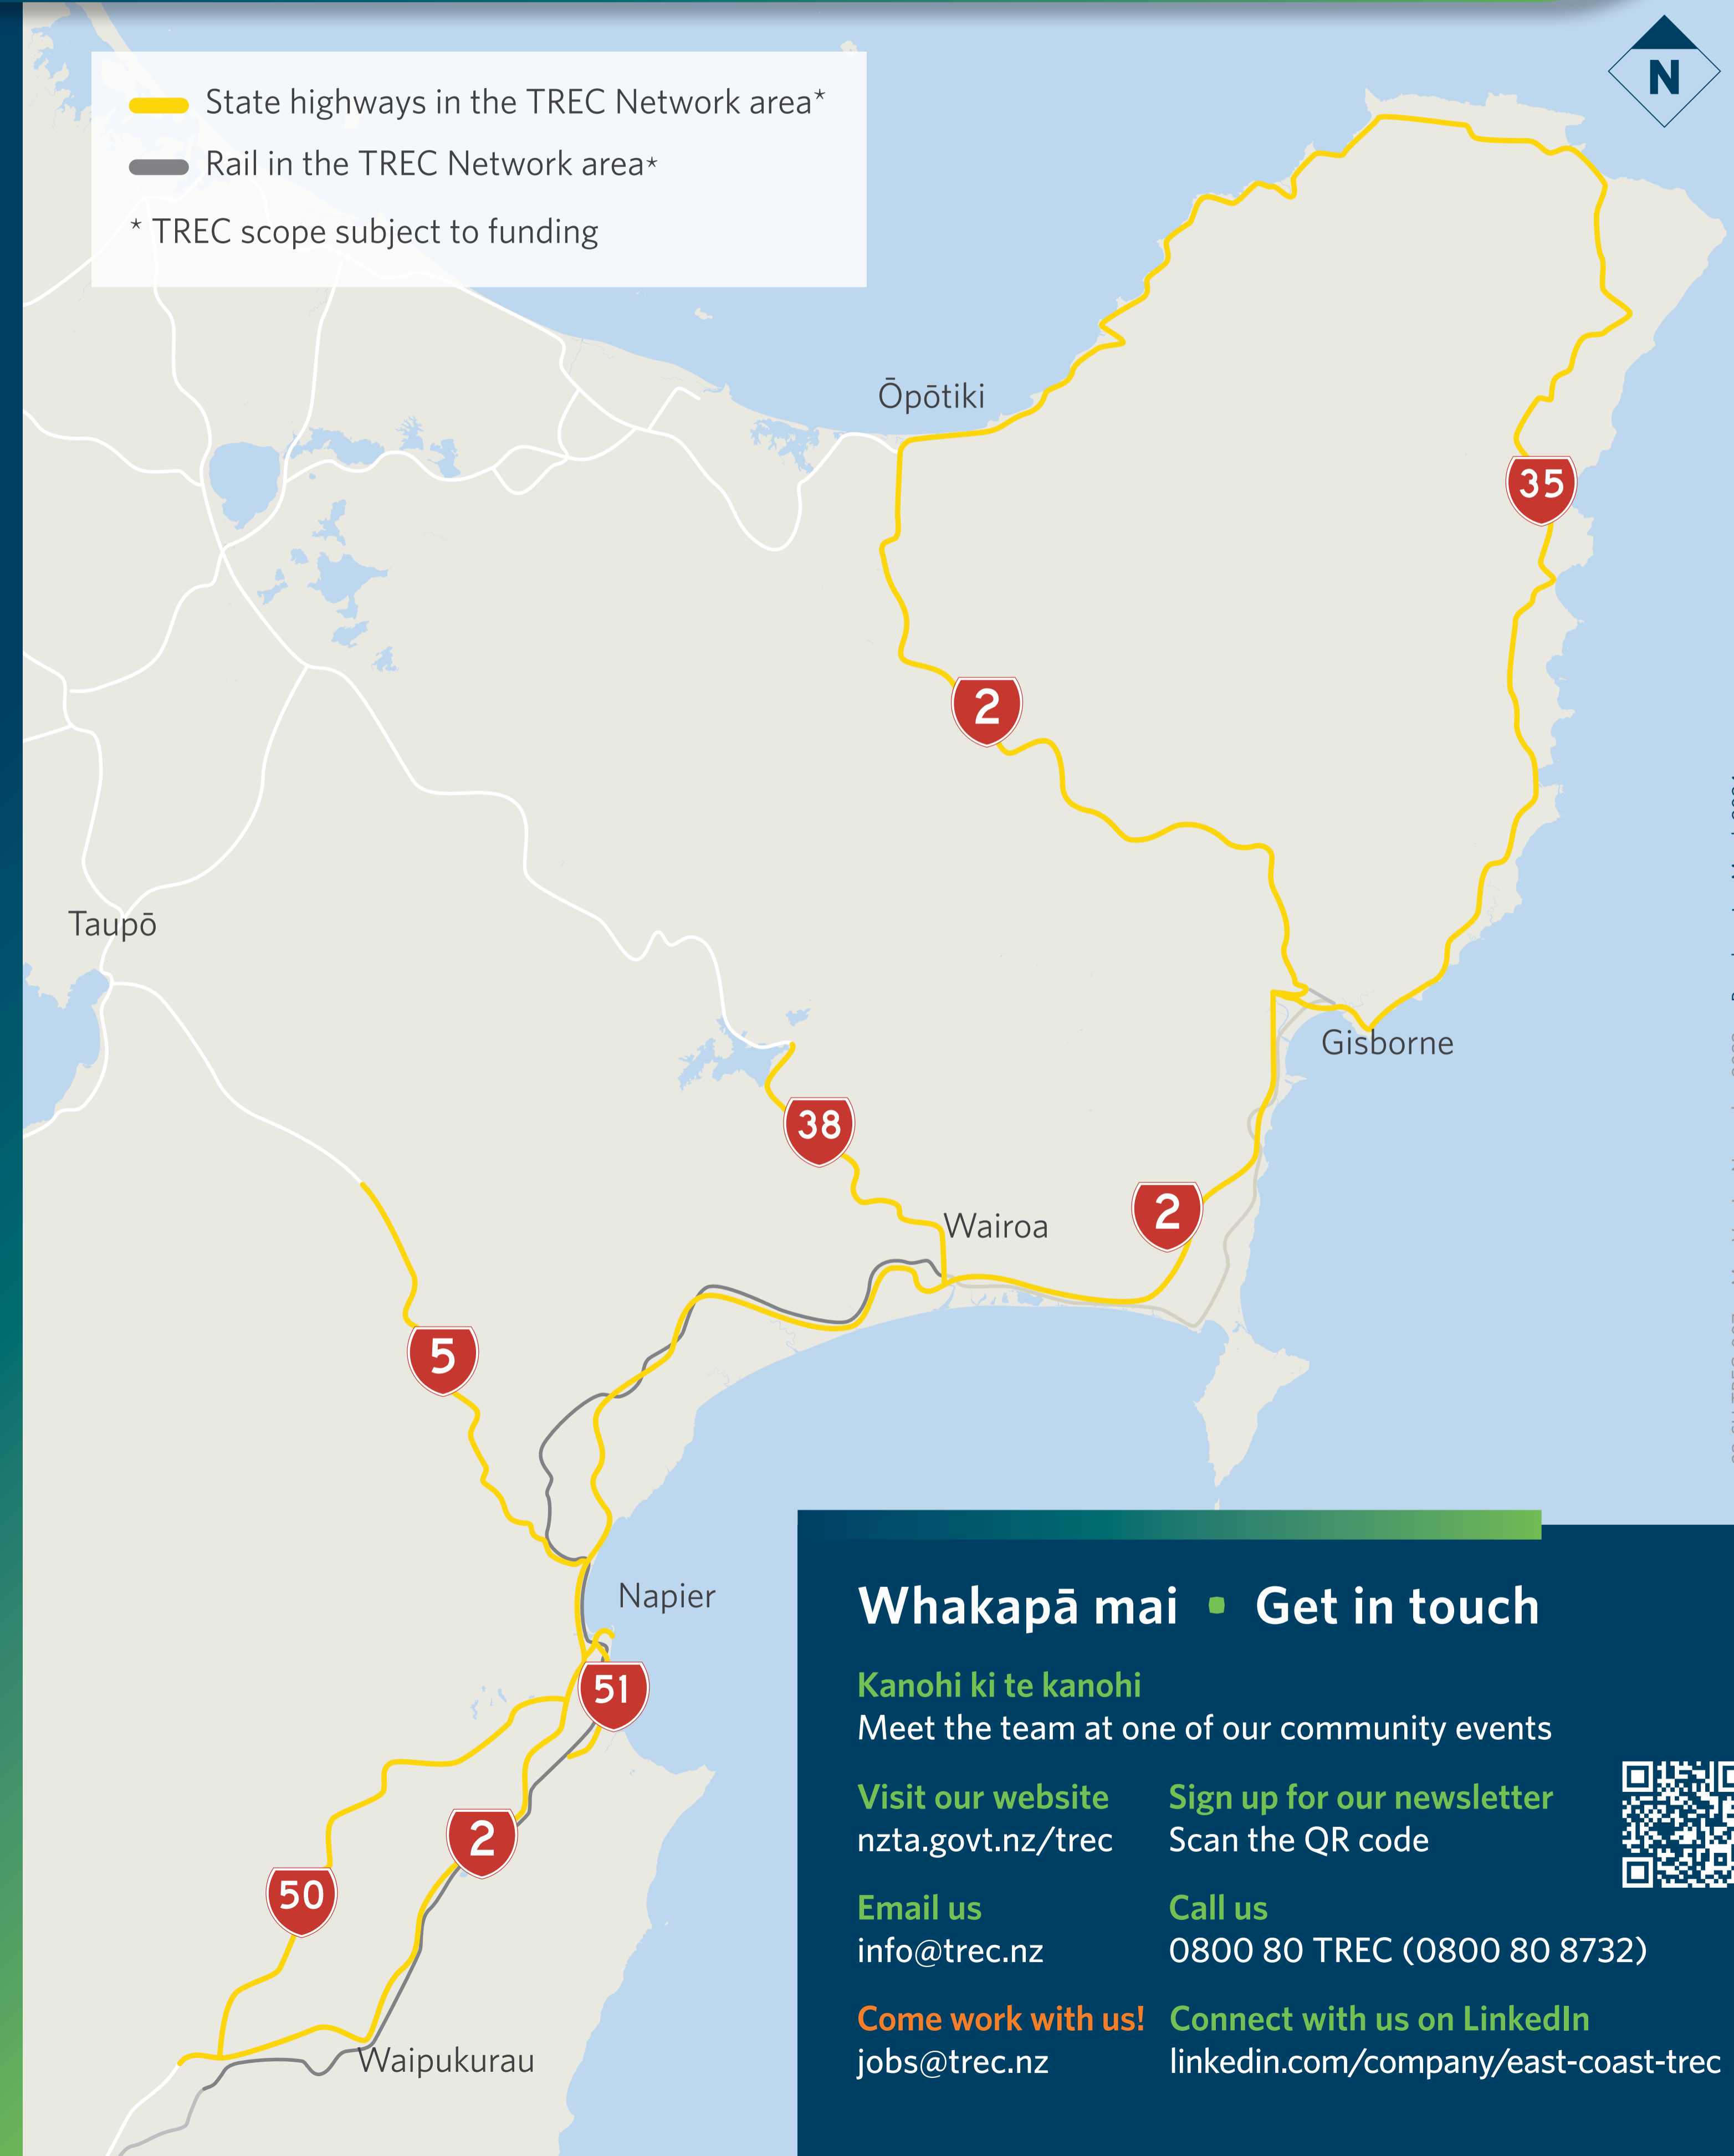

We're listening

TREC will involve communities as much as possible to gather insights and experiences. How we work and what we do needs to reflect what's important to East Coast communities.

A good neighbour

As a good neighbour in your community we respect your place, we'll listen to you and inform you on our planned work. TREC will grow to around 1000 workers on the ground - mostly local but some from other regions to help.
