

SECTION I-19: PROCESS TO REGISTER NEW TTM EQUIPMENT FOR USE ON NZ ROADING NETWORK

25 AUGUST 2022

Waka Kotahi maintains a register of new TTM equipment that has been approved for use on the roading network within New Zealand.

To gain approval for TTM equipment to be added to this register the supplier must:

Action	Comments
Provide evidence of safe and reliable operation of the TTM equipment	<ul style="list-style-type: none">• Evidence can be obtained from:<ul style="list-style-type: none">– Existing research– Conducting of trials (approved by NZTA)<i>For more information refer to Guidance on trial/field test on the following page</i>
Confirm that the TTM equipment meets relevant requirements as detailed in the TCD Rule	<ul style="list-style-type: none">• Sometimes this confirmation will require testing by the NZTA approved laboratory (eg portable traffic signals) <i>For more information refer to Guidance on trial/field test on the following page</i>
Provide a detailed Operator Guide	<ul style="list-style-type: none">• Operator guide to include:<ul style="list-style-type: none">– Safe operation of the equipment– Installation and removal procedures (if required)– Any specific TTM requirements

The process on the following page provides further guidance on whether a trial or a field test will be required and who to contact about this.

GUIDANCE ON TRIAL/FIELD TEST

This procedure is designed to clarify the process for requesting approval to use new TTM equipment on the NZ roading network.

Example: New temporary traffic light system
