

**CHANGES TO F/6
SPECIFICATION FOR GEOTEXTILE WRAPPED AGGREGATE
SUBSOIL DRAIN CONSTRUCTION**

The major changes in this 2003 edition of the TNZ F/6 specification are:

- Replacing the geotextile requirements with a reference to TNZ F/7 “Specification for Geotextiles”.
- Removal of guidance on geotextiles from the notes as this is now in TNZ F/7.
- The use of the term Filter Fabric is replaced by Geotextile.
