Year end 1999	11.28	12.01	12.87	18.08	14.37	13.74	16.04

Important notes:

1. The figures are of current vehicles recorded in the Motor Vehicle Register, excluding vehicles with cancelled or lapsed registration.
2. The mean age is the sum of the products of vehicle totals multiplied by age, divided by total vehicles.
3. The mean age of the national vehicle fleet is not available prior to 1999.
4. The age of the fleet is a conservative estimate only. The provision of the year first registered instead of the vehicle year (ie, either the year of manufacture or the model year as denoted by the manufacturer) for some used imported vehicles, may result in the overall age of the vehicle fleet being understated.

Notes: The total fleet is the number of vehicles recorded in the Motor Vehicle Register, excluding vehicles with cancelled/lapsed registration. The darker shaded cells in the table above indicate the vehicle categories included for the purpose of calculating crash rates (refer to *Motor vehicle crashes in New Zealand* published annually by the Ministry of Transport). These include motorised vehicles designed primarily for on road use and exclude vehicles with an exempt or restoration licence.

Car	A vehicle designed primarily for the carrying of passengers.
Commercial	A vehicle designed primarily for the carriage of goods such as vans, utilities and trucks. This definition also includes buses and coaches in our registration statistics.
Ex-overseas	An ex-overseas vehicle is one which has been previously registered in another country before arrival in New Zealand (ex-overseas vehicles are also referred to as used imports).
Gross vehicle weight	Also known as gross vehicle mass – denotes the manufacturer’s gross laden weight of a vehicle, in kilograms.
Licensing	The process of issuing a licence to a vehicle to allow it to be used on the road. Vehicles are licensed after they are registered – the vehicle owner pays a licensing fee, and a licence label is attached to the vehicle.
Miscellaneous	A miscellaneous vehicle (in registration statistics) is one which, by its design, is not of a commonly defined vehicle type eg, steam engine, crane.
New	For the purpose of registration statistics, the definition of new also includes ex-overseas vehicles.
Postal districts	Where indicated, figures are tabulated by areas of New Zealand known as postal districts as defined by NZ Post. These districts have been retained to provide historical trend analysis.
Registration	The process of adding a vehicle to the Motor Vehicle Register – a vehicle, whether new or used, must first be registered before it can be licensed to be used on the road. Registration has been traditionally confused with licensing – registration is normally carried out only once in the lifetime of a vehicle, whereas licensing is renewed every six or twelve months.

Notes:

1. The statistics in this book refer to vehicle registrations – not vehicle imports. Import statistics would generally differ from registration statistics because of the carry-over of stocks from one year to the next.
2. All the statistics in this book refer to calendar years, unless otherwise indicated. Where data is reported as at 30 June, this relates to the Land Transport New Zealand financial year from 1 July to 30 June.
