Year end 2000	11.42	12.25	13.03	18.44	14.83	13.94	16.28
Year end 1999	11.28	12.01	12.87	18.08	14.37	13.74	16.04

**Notes**

1. The figures are of current vehicles recorded in the motor vehicle register, excluding vehicles with cancelled or lapsed registration.
2. The 'mean age' is the sum of the products of vehicle totals multiplied by age, divided by total vehicles.
3. The mean age of the national vehicle fleet is not available prior to 1999.
4. The age of the fleet is a conservative estimate only. The vehicle year recorded on the motor vehicle register may be the year of manufacture, the model year as denoted by the manufacturer, or the year in which the vehicle was first registered. This may result in the overall age of the vehicle fleet being understated.

**Total licensed vehicles, by vehicle type, as at year end June 2007**

	June 2007		June 2006		June 2005
	Total	% variation from previous year	Total	% variation from previous year	Total

11	Motorcycles	73,082	57,048	50,567
12	ATVs	4,416	3,604	2,987
13	Special purpose vehicles	2,394	2,131	2,078
Total		3,852,060	3,704,870	3,593,990

Vehicles used for crash rate calculation  
(refer to *Motor vehicle crashes in New Zealand*,  
Table 1: Casualty rates, historical)

3,243,360

3,124,329

3,030,432

**Notes:** The total fleet is the number of vehicles recorded in the motor vehicle register, excluding vehicles with a cancelled/lapsed registration. The darker-shaded cells in table 39 indicate the vehicle categories included for the purpose of calculating crash rates (refer to *Motor vehicle crashes in New Zealand*, published annually by the Ministry of Transport). These include motorised vehicles designed primarily for on-road use and exclude vehicles with an exempt licence.

<b>Car</b>	A vehicle designed primarily for the carrying of passengers.
<b>Commercial</b>	A vehicle designed primarily for the carriage of goods, such as vans, utilities and trucks. This definition also includes buses and coaches in our registration statistics.
<b>Ex-overseas</b>	An ex-overseas vehicle is one that has been previously registered in another country before arrival in New Zealand (ex-overseas vehicles are also referred to as used imports).
<b>Gross vehicle weight</b>	Also known as gross vehicle mass – denotes the manufacturer's gross laden weight of a vehicle, in kilograms.
<b>Licensing</b>	The process of issuing a licence to a vehicle to allow it to be used on the road. Vehicles are licensed after they are registered – the vehicle owner pays a licensing fee, and a licence label is attached to the vehicle.
<b>Miscellaneous</b>	A miscellaneous vehicle (in registration statistics) is one which, by its design, is not of a commonly defined vehicle type, eg steam engine, crane.
<b>New</b>	For the purpose of registration statistics, the definition of 'new' also includes ex-overseas vehicles.
<b>Postal districts</b>	Where indicated, figures are tabulated by areas of New Zealand known as postal districts as defined by the NZ Post Office. These districts have been retained to facilitate the historical trend analysis.
<b>Registration</b>	The process of adding a vehicle to the motor vehicle register – a vehicle, whether new or used, must first be registered before it can be licensed to be used on the road. Registration has been traditionally confused with licensing – registration is normally carried out only once in the lifetime of a vehicle, whereas licensing is renewed every six or 12 months.

### Notes

1. The statistics in this book refer to vehicle registrations – not vehicle imports. Import statistics would generally differ from registration statistics because of the carry-over of stocks from one year to the next.
2. All the statistics in this book refer to calendar years, unless otherwise indicated. Where data is reported as at 30 June, this relates to the Land Transport New Zealand financial year from 1 July to 30 June.
