Technical Notes

What is MADT? Monthly Average Daily Traffic (MADT) is the average of daily traffic volume in a given month. Each monitored location (count site), MADT is reported for all vehicles and heavy vehicles¹.
MADT is the statistical term used throughout this report.

A more commonly reported statistical term is Annual Average Daily Traffic (AADT), which measures the average of daily traffic volume over a given calendar year.

How is MADT Change Reported Each month?

We report MADT change for all vehicles and for heavy vehicles, at a national and regional level.

We first calculate the percentage change in MADT (all and heavy vehicles separately) of each site for the current month compared to the same month in the previous year.

We then calculate the median of those percentage changes across all sites and report it as the national MADT change for the current month.

To report each regional MADT change, we calculate the median of percent changes of the sample sites in each region.

Purpose

Monthly Average Daily Traffic (MADT) reporting enables us to provide a month-by-month indication of traffic trends, and to allow the effects of specific events (e.g. storms, fuel price shifts, economy, etc.) to be monitored.

Site Coverage

The table below shows the number of traffic counting sites in each NZ Transport Agency region. These numbers represent the sample sizes that are used to report the National and regional MADT changes in this report.

| NZ Transport Agency Region | Number of Sites |
|--|-----------------|
| Northland and Auckland | 18 |
| Waikato and Bay of Plenty | 25 |
| Taranaki, Manawatu-Wanganui, Hawkes Bay and Gisborne | 19 |
| Wellington, Nelson, Marlborough and Tasman | 17 |
| Canterbury and West Coast | 15 |
| Otago and Southland | 19 |
| Total | 113 |

These sites are mostly NZTA's national telemetry site. There are also a few regional continuous sites used in Auckland.

Sources of variation in MADT

The number of weekends in a specific month can affect the MADT comparability between years. Also, public holidays that occur in different months can affect comparisons between years. This report does not attempt to compensate for these variations.

¹ Heavy vehicles are those with a gross vehicle mass exceeding 3.5 tonnes.

**Results:
Monthly
traffic at key
sites**

Five key sites have been selected to represent five main centres in NZ.

The MADT values for February 2012, February 2013 and percentage change compared are reported in the table below.

Note the MADT values include all vehicles.
