Kia ora Prisca

Please see below, this is something we would ordinarily put in a weekly report just to inform the office but as there isn't one currently just sharing this with you.

Waka Kotahi is planning to go out with limited community consultation (4 weeks) from 13/11/23-11/12/23 regarding a the approval of an Intersection Speed Zone (ISZ) at the Dunns Crossing/Walkers Road intersection in Selwyn District (SH1 South of Christchurch). Engagement will be carried out with Selwyn District Council, the community of Rolleston and key. A 70km/h temporary speed limit (TSL) at the intersection was installed as part of the Canterbury Southern Motorway project (now completed). This TSL has recently been removed and restored back to 100km/h as required by the Setting of Speed Limit 2022 Rule. The TSL was removed in May 2023. The removal of the 70km/h temporary speed limit (TSL) has resulted in community and stakeholder pressure to fast-track safety improvements at this location. The NZUP SH1 Rolleston Transport Improvements Project includes plans to install a roundabout at this intersection which is a primary safe system intervention for this intersection. The ISZ is an interim solution. <sup>s 9(2)(g)(i)</sup>

Emergency services have signalled strong support for improving safety at this intersection as quickly as possible.
