

MIN-4392 Alternative Method Proposals

23 February 2024

Providing additional information on the Alternative Method Proposals referred to in BRI-2917 *Speed management plans – progress to date*.

NZ Transport Agency Waka Kotahi's response:

- Clause 2.6 of the Land Transport Rule: Setting of Speed Limits 2022 (the Rule) sets out an alternative method for road controlling authority (RCA) or territorial authorities to set speed limits. RCAs can submit a speed management proposal for Director of Land Transport's approval outside the speed management plan (SMP) cycle i.e before its first or next SMP. Under the Rule, the Director must approve the proposal if satisfied that 'good reason' exists for the proposed speed limit(s) to be set before the next relevant plan is published.
- If the scale of the proposal is network-wide, the RCA should consider including the proposal in the next relevant SMP or bundling with similar proposals into an interim SMP.
- The Director can approve an Alternative Method proposal that has already been or will be consulted on in accordance with Clause 3.9 of the Rule (Consultation requirements) which cites Section 82 (Principles of consultation) of the Local Government Act 2002. SMPs are required to be consulted on before they are certified by the Director.
- The Rule requirements for consultation with Māori (Clause 3.9) apply to both Alternative Method proposals and SMPs. Relevant groups should be provided with information on any proposals and given the opportunity to provide feedback.
- There are no set timeframes for Alternative Method proposals or SMPs. Timeframes for SMPs were revoked in the 2023 amendment to the Rule.
- For more details on each of the listed Alternative Method Proposals in BRI-2917, such as the proposed speed limit changes and associated dates of certification and implementation, please refer to the appendix enclosed.

MIN-4392 Appendix

Note: Variable speed limits (VSL) are shown as "variable speed limit/permanent speed limit". For example, 30 VSL/50 indicates that while a VSL is in operation the speed limit is 30km/h, at all other times the permanent speed limit is 50km/h.
