

OIA-15439 - [REDACTED]

Report Date: 6 June 2024

Data extract date: 6 June 2024

Requester: [REDACTED]

Request: *Could I please have an update on the data from this.*

Previous request: *Could I please request statistics of the crash rates in each region from 2023. And the crash rate from each region in 2024 already.*

Source database: Crash Analysis System (CAS)

Report produced by: Data Services

Peer reviewed by: Data Services

Please note the following concerning the data contained in this spreadsheet:

- This data is provided from the road traffic crash database; Crash Analysis System (CAS) version 2.9.1.
- NZ Transport Agency Waka Kotahi (NZTA) maintains CAS which is updated once a Traffic Crash Report (TCR) is received from New Zealand Police sometime after the crash.
- Data is for all crashes for the periods from 1 January 2023 to 6 June 2024 as recorded in CAS to date as at 6 June 2024.
- A crash, to be recorded in CAS, must have occurred on a road. The CAS definition of a road is any street, motorway or beach, or a place to which the public have access with a motor vehicle, whether as of right or not e.g. a public car park.
- Due to New Zealand Police's reporting timeframe and subsequent data processing, there is a lag from the time of a crash to full and correct crash records within CAS.
- Fatal crash report data is usually recorded in CAS within one working day of NZTA receiving it from New Zealand Police. Serious Injury and Minor injury crash report data is usually recorded in CAS within 4 weeks. Data relating to non-injury crashes may take up to seven months before it appears in CAS.
- Due to the nature of non-fatal crashes, it is believed that these are under-reported, with the level of under-reporting decreasing with the increasing severity of the crash.
- 2023 and 2024 data is not yet complete in CAS but these are the current figures from CAS as at 6 June 2024.
