06.1.6 Attachment 6 – Update for Approval / SH1 Wellington Improvements, October 2024

Update	<ul style="list-style-type: none"> Board workshop on 22 August 2024 presented options for SH1 Wellington Improvements, including the Second Mount Victoria Tunnel and Basin Reserve Upgrade (with and without a Terrace Tunnel duplication), and a Long Tunnel. These project options were then presented to the Minister of Transport on 5 September 2024. Out of Scope

Fast-track Approvals Bill – Listed Projects – Summary project list

Project	Pathway	Rationale / Considerations – of listing
Out of Scope		
Wellington Tunnel and SH1 Improvements SH1 corridor changes in Wellington City including a tunnel and possible changes around the Basin Reserve and associated infrastructure, activities and works. This is the replacement NZTA project for Basin/Tunnel aspects of former LGWM partnership programme. Note: the intention is to include a broad project description that could cover off many possibilities.	List – Part A	Why: While there are several design options on the table, listing this project will give the greatest certainty around statutory approval timeframes. This is indicated as a phase 2 NLTP priority RoNS. Risks: Need to ensure both a parallel Mt Vic tunnel, diagonal tunnel and the long tunnel options are available through this process so the project description in the bill needs to be sufficiently broad. Unknown risk of ineligibility
