

DISTRACTED DRIVING

In 2022,
distraction
was a
factor in

22
DEATHS

*Data is for all crashes
reported by NZ Police
to Waka Kotahi NZ
Transport Agency
for the year 2022 as
recorded in the Crash
Analysis System
(CAS) at 4/4/2023.

113
SERIOUS INJURIES*

DISTRACTION TYPES

Distractions can affect drivers in different ways, and can be categorised into the following types:

TAKING YOUR EYES OFF THE ROAD

TAKING YOUR HANDS OFF THE WHEEL

NOISES THAT DISTRACT YOU

THINKING ABOUT SOMETHING OTHER THAN DRIVING

DANGER ZONES

Drivers engaged in TXT messaging on a mobile phone are

23
TIMES MORE LIKELY

to be involved in a crash than drivers focused on the road

Sending or reading a text takes your eyes off the road for

4.6
SECONDS

At 90km/h that's like driving the length of a rugby field blindfolded

The majority of fatal and serious injury crashes involving driver distraction occur at **peak commuting times** in the morning and evening

BIGGEST DISTRACTIONS

MOBILE PHONES

Put phone on silent and let calls go through to voice mail. Reply to texts when you finish driving.

TALKING TO PASSENGERS

Keep conversations to a minimum - your eyes and mind should be on the road.

REACHING FOR OBJECTS

Make sure objects are secure in your car.

GPS/MAPS

Programme/plan your route before you leave. Pull over if you need to reprogramme/check.
