

Only **2%** of road users on the Southern Coromandel Loop are motorcyclists

But they make up **42%** of the deaths and serious injuries\*

For motorcyclists the Southern Coromandel Loop can be an unforgiving road. That's why we've installed smarter road markings, more barriers, safer culverts, sealed entrances and improved sight distances and readability on curves. But the rest is up to you. Ride with your eyes open, your mind engaged and your senses alert. Enjoy the ride and stay safe.
