

Bridges

Bridges along the Cambridge section

HEB and the NZ Transport Agency would like to thank the community for their patience throughout the project as traffic was transferred to the new alignment and speed restrictions were in place.

Pickering Road bridge Pukeroro

- Length: 22m Width: 25m
- Carries Expressway traffic over Pickering Road

Northern interchange Te Koopuu Maania

- Length: 80.7m Width: 9.7m
- Provides a south-bound flyover for Expressway traffic to exit south-bound, and a north-bound on-ramp for existing SH1 traffic to join the Expressway

Swayne Road bridge Parawhau

- Length: 46.6m Width: 12.1m
- Carries local road traffic over the Expressway

Peake Road bridge Te Ara o Te Waharoa

- Length: 43.6m Width: 13.6m
- Carries local traffic over the Expressway
- Wide shared path with higher railings for pedestrians and horse riders

Thornton Road bridge Te Ara Noa

- Length: 38.2m Width: 12.8m
- Carries local traffic over the Expressway
- Is built at ground level with the Expressway approximately 6m below ground level at this point

Victoria Road interchange Te Oko Horoi

- Length: 54.9m Width: 11.0m
- Carries Expressway traffic over Victoria Road
- Provides a full diamond interchange with access on and off the Expressway both north and south-bound

Southern interchange Te Koo Utu

- Length: 66.9m Width: 23m
- Delivers south-bound Expressway traffic back to the existing SH1 south of Cambridge
- Provides a north-bound off-ramp into Cambridge for SH1 traffic
