17 June 2019

CHANEYS ON RAMP UPDATE - TWO WAY TRAFFIC ON MAIN NORTH ROAD WITH TEMPORARY TRAFFIC LIGHTS

From **Monday 24 June** two-way traffic on Main North Road, near the closed Chaney's on-ramp, will be managed with temporary traffic lights. These lights are on a timer and also vehicle activated. Please allow a few minutes extra time for your travel in this area.

Traffic Impact

During the work **from 24 June until early October** two way traffic on Main North Road between Dickeys Road intersection and Marshland Road will be maintained. As the work takes place at different stages - on the eastbound lane, the westbound lane or in the middle of the road - we have to shift the traffic onto one lane and manage two-way traffic with traffic lights.

Please note that the Chaney's on-ramp is closed until early October. During the Chaney's on-ramp closure there is no left turn from Marshland Road onto Main North Road. Driving along Main North Road to go to Marshland Road will not be affected by the on-ramp closure.

What are we doing?

The work on Main North Road includes installing services like a stormwater culvert, realigning and installing new power cables, IT service cables and reconstructing Main North Road; widening the road. New kerbs and a footpath will also be installed.

Temporary traffic lights will be in place on Main North Road from late June to early October.
