CRANFORD STREET - STREET LIGHT INSTALLATION

From about Thursday 27 September we will be installing the new streetlight poles on Cranford Street and around the Innes Road Intersection. This work will take about a month.

TRAFFIC IMPACTS

At each streetlight location we will need to close the road shoulder, park a crane-truck and detour the footpath. If our work is likely to affect access to your property we will 'door knock' to let you know and work around your needs as best we can.

NEW POWER CONNECTIONS

Orion's subcontractor will also be changing power connections over to the newly laid power cables in early October. This may mean your power is cut off for a short time. You will hear from your own power provider if and when this will affect you.

Thank you, we really appreciate your continued patience as we upgrade Cranford Street. If you have any queries, please contact us on 0800 262 200.
