

# Christchurch Northern Corridor Cranford Street

PROJECT UPDATE

28 MAY 2018

## WORK IS MOVING TO THE WEST SIDE OF CRANFORD STREET

The Christchurch Northern Corridor (CNC) Alliance team is making good progress on the Cranford Street Upgrade. From Wednesday 30 May the installation of underground power cables will start on the west side of the street.

Excavations will start in the footpath in front of 253 Cranford Street (Beckenham Dental Lab) and will move north along the west side of Cranford Street.

### TRAFFIC IMPACTS

To maintain traffic flow we will need to shift traffic lanes and provide temporary footpaths.

To install the cables across the intersections at Knowles Street and Weston Road we will close one traffic lane.

**For a couple of days there will be no entry onto the west side of Cranford Street from Knowles Street and then no entry from Weston Road.**

Access to properties may be limited at times. Please check with our site traffic management supervisor (the one wearing the yellow vest with STMS on the back) for any special vehicle access requirements on the day we are outside your house.

On-street parking will be removed from areas near our work site. This is for the safety of all road users and our crew. Please park further along Cranford Street or on a side street.

At times there will be a diversion for the footpath and temporary crossing points will be provided. Please be aware of the changed traffic conditions and take care around our work site.

REDUCED  
COMMUTER  
TRAVEL TIME

REDUCED  
CONGESTION

IMPROVE  
SAFETY

IMPROVE  
WALKING  
AND CYCLING

SUPPORT  
ECONOMIC  
GROWTH

At times we will have to move the bus stop. A temporary bus stop will be set up, no-parking cones and signs will indicate the temporary bus stop area.

Please support the businesses on Cranford Street and continue to shop local during our works.

## WHAT DOES THIS WORK INVOLVE?

We will be digging a trench along Cranford Street between Innes Road and Weston Road and then Weston Road to McFaddens Road.

Once the cable is installed, in one go, we can backfill the trench. There will be noise from trucks, the excavator and the crew working.

We need to use concrete cutters at times and before we reinstate the road we will need to use a compactor, this can be noisy as well and you may feel ground vibrations if you live close to the work site.

## WHAT'S NEXT?

In late June we will install a new Council storm water pipe and sumps.

Once all the cables are in and the storm water work is complete, we will start removing and installing new kerbs and new footpaths.

## WHAT YOU NEED TO KNOW

- › Our standard construction work hours are Monday to Saturday between 7am and 7pm.
- › There will be increased noise and vibrations associated with most of the construction work. We will do what we can to minimise this.
- › Keep yourself and your children, as well as pets at a safe distance from the work site. Please stay behind the construction fences at all times.
- › All work sites are subject to weather and other unforeseen conditions. Some jobs will be finishing early while others may be delayed or rescheduled.

You can call us on 0800 262 200 or email us at [info@cncalliance.co.nz](mailto:info@cncalliance.co.nz) or visit our site office at the corner of Cranford Street and Innes Road during drop-ins on Friday from 10am to 12pm.
