WINTERS ROAD EAST OPEN AGAIN; LEFT IN AND OUT ONLY

From early morning **Wednesday 3 June**, the original Winters Road access east of the new motorway is open for all traffic again, left in and out only.

Traffic Impact

With the reopening of the original Winters Road access, the temporary road next to the CNC Alliance project office will have no direct access to QEII Drive from Tuesday night 2 June. The temporary road will continue to provide access for CNC vehicles and visitors to access the parking lot and our back yard.

Please be aware of the pedestrians and cyclists on the shared use path on Winters Road when entering Winters Road from QEII Drive and leaving your driveway.

Thank you

Thank you for your cooperation while we are building the QEII Drive upgrade. The temporary access road for Winters Road was put in place in January 2019, and we have very much appreciated your patience during these times.

The temporary road next to our project office will be closed, there will be no direct access to QEII Drive from this driveway.
