

Christchurch Northern Corridor

13 August 2018

NIGHT WORKS QEII DRIVE + WINTERS ROAD INTERSECTION

As part of our QEII Drive upgrade we need to install street light cables. For this work we will close one traffic lane on QEII Drive between 230 QEII Drive and Winters Road. Two way traffic on QEII Drive will be maintained by stop/go traffic controls. The work will start from **Monday evening 20 August and is planned each night from 8pm to 7am till Friday morning 24 August.** We are trenching at two different locations (starting near 230 QEII Drive and then at Winters Road intersection).

Traffic Impact

During this work the traffic on QEII Drive will be managed with a stop/go person. This means one lane of traffic will have to wait for the other side to pass along the work sites. If you are travelling on QEII Drive please expect delays, slow down near the work sites and take extra care.

Pedestrians and cyclists on the shared path will be diverted along the work site. *See red lines on map for our work site locations.*

Construction Impact

At the two different locations, each for two nights, we will be using concrete cutters (early evening use), excavators and compactors to dig a trench, place the service and then fill in and reseal the trench.

There will be some noise from a hydro truck, machinery and the crew working overnight. The crew need lights to see what they are working on, so you may notice extra light coming from the road.

Stop/go traffic controls on QEII Drive at night can delay your trip by up to five minutes
