

CRANFORD STREET NIGHT WORK

We have to install a new water main pipe on Cranford Street west, between PlaceMakers and the new shared use path bridge over Dudley Creek. A new street light pole will also be installed.

To minimise traffic impact we will do this work at night.

This work will start on **Sunday evening 18 October and will continue each night until Thursday 22 October**, work starts around 7pm each night.

Construction impact

The work involves digging a trench, truck movements and compacting the ground before asphaltting the trench areas.

Nearby residents will hear the noise from the machines and the crew working at night.

Traffic impact

During the night work traffic will be managed with lane shifts.

We are working at night for 5 nights.
