10 February 2020

## TEMPORARY DIVERSION FOR QEII DRIVE SHARED USE PATH

From **Monday 17 February until late April**, cyclists and pedestrians using the QEII Drive shared path between Philpotts Road and Innes Road roundabout will need to follow a diversion while we rebuild the existing shared use path. The diversion will add about 500m to this journey but will be a far safer option than a temporary path along QEII Drive. The Hills Road subway stays open as normal and we will provide for extra street lighting along Buller's Stream Walkway, the diversion route.

### Traffic Impact

A map of the diversion is overleaf and will see cyclists and pedestrians using Innes Road or the Hills Road subway and then E Ellington Drive and the Buller's Stream Walkway.

### Thank you

Thank you for your cooperation and patience while we are building the QEII Drive upgrade. The shared use path will be upgraded to be wider and new plants and trees will be planted. The QEII Drive shared path will connect to the new CNC shared path via the upgraded Hills Road and Grimseys Road and the new Winters Road subways.

Cyclists and pedestrians will need to divert to Buller's Stream Walkway, Hills Road and Innes Road during the QEII Drive shared path closure.
