

Christchurch Northern Corridor Waimakariri Bridge - SH1

PROJECT UPDATE

10 FEBRUARY 2020

Night work north of the bridge

Please expect slow traffic in both directions during the night work from 16 February till early March.

SH1 LANE CLOSURES AT NIGHT

The Christchurch Northern Corridor (CNC) Alliance has reprogrammed asphaltting the new Waimakariri Bridge decks and work on the approaches. Excavations for the approach foundations will happen at night to minimise traffic disruption. Please expect delays due to lane closures in both directions.

We are digging out the approaches for the new bridge lanes north of the Waimakariri Bridge. To do this work the right hand lanes northbound and southbound will be closed every night (Sunday to Thursday) from **7pm till 5.30am, beginning Sunday 16 February till early March.**

This means only one lane will be available in each direction during this work. A 60km/h speed limit will be in place at night.

This updates previous notification, including timeframes, which have shifted due to resource availability.

What's next?

In late February, we will be asphaltting the new bridge decks. There will be no traffic impact during this work: two traffic lanes, north and southbound will be maintained.

In early March, we will be resurfacing the existing northbound lanes on SH1 south of the Waimakariri Bridge and the existing northbound lanes on the bridge.

When we do this work northbound traffic will shift onto the new bridge lanes in the middle. We will provide more information on this closer to the day of the traffic switch on the bridge.

More information on the extra lanes on the bridge and the carpool lanes can be found in the video section at: [ntza.govt.nz/cnc](https://www.ntza.govt.nz/cnc)
