

# Christchurch Northern Corridor

5 June 2020

## WINTERS ROAD EAST OPEN AGAIN; LEFT IN AND OUT ONLY

We are sorry, we would have liked to open Winters Road on the 3rd of June, however work took a little bit longer. From **Sunday 14 June**, the original Winters Road access east of the new motorway is open for all traffic again, left in and out only. We need to seal the road so the Sunday date is weather dependent.

### Traffic Impact

With the reopening of the original Winters Road access, the temporary access road next to the CNC Alliance project office will close. This driveway will continue to be used for CNC vehicles and visitors to access the parking lot and our back yard. Please be aware of the pedestrians and cyclists on the shared use path on Winters Road when entering Winters Road from QEII Drive and leaving your driveway.

### Thank you

Thank you for your cooperation while we are building the QEII Drive upgrade. The temporary access road for Winters Road was put in place in January 2019, and we have very much appreciated your patience during these times.

The temporary road next to our project office will be closed, there will be no direct access to QEII Drive from this driveway.
