

# Christchurch Northern Corridor

25 January 2019

## PHILPOTTS ROAD OPEN TO TRAFFIC EXITING LEFT ONLY

From **Thursday morning (6am) 31 January** access to the new lanes on QEII Drive from Philpotts Road (left out only) will be open, weather permitting. Chipsealing happens on Wednesday, and line painting on Wednesday evening. If it rains the opening moves to the next day, Friday morning 1 February.

### Traffic Impact

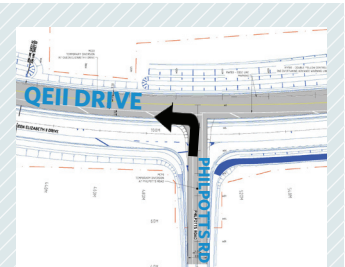

You can turn left on Philpotts Road to access the new lane on QEII Drive. There is no access into Philpotts Road from the new lanes on QEII Drive.

Please stay alert for our construction traffic in the area and for cyclists and pedestrians on the shared path, the path crosses the road on the former QEII Drive lanes. There is a 60km/h speed limit (50km/h during loose gravel period) in place on QEII Drive between Innes Road and Main North Road during the construction of the upgrade.

### Thank you

Thank you for your cooperation and patience while we are building the QEII Drive upgrade. Please consider the local businesses on Philpotts Road, like Oderings Garden Centre, by using Innes Road to enter Philpotts Road.

The left out only set up at Philpotts Road stays in place during the construction till April 2020.

You can turn left on Philpotts Road to access westbound traffic lane on QEII Drive while we continue to work on the upgrade.
