The process

Details of the project journey so far

The Transport Agency lodged a NoR with Tauranga City Council for land needed for

the project, and to designate the proposed road. Once the designation was confirmed, the Transport Agency applied for construction funding. Specimen design

Drawings and designs were developed to assist with the tendering for the contract.

The resource consents were lodged.
These are associated to the earthworks and stormwater

treatment.

Dec 2014

2014

The project went out to tender for contractors to price to design and construct the underpass.

Sept **2015**

2013

Construction

Construction begins in September 2015. It will take approximately two and half to three years to build the Maungatapu underpass at an estimated cost of \$45 million.

Enabling works

A series of smaller projects were required for site preparation prior to the main project starting. The enabling works included things like building the new scout hall and early site clearance.
