

Maungatapu underpass

What you can expect from mid-April: Connecting to local roads

As work on the Maungatapu underpass progresses, we need to connect the underpass with existing local roads, and resurface the Hairini and Maungatapu roundabouts. This will impact on travel through the area from mid-April to late May. We will do as much work as we can on Welcome Bay Road during the school holidays to minimise the impact on your travel.

From mid-April through these areas there will be lane diversions in place, speed restrictions, temporary pedestrian diversions, unsealed surfaces, off peak and night works, and possible delays. This work is weather dependent. Please allow more time for your journey, and travel safely through these areas.
