

Waikanae bridge clip-on work detour

Planned works

From 16 January Waikanae Bridge on old SH1 will be closed to southbound traffic while we install a shared path clip-on. Work on this shared path will continue through until May/June.

The southbound detour will be via the Expressway. Access for northbound traffic will remain open.

For safety reasons, pedestrians can't access the bridge while the closure is in place.

Key

-  Southbound detour route
-  Worksite

Southbound detour
Allow extra time for your journey

Once installed, the clip-on bridge will make crossing Waikanae River much safer for pedestrians and cyclists. While we understand this work will create some delays for road users and will impact on pedestrians during construction, we're committed to improving safety for all pedestrians and cyclists.

By building a shared path, well-separated from other road users, we're creating a safer and more enjoyable journey - not just for cyclists and pedestrians - but for motorists too.

Access to homes and businesses on the Main Road will be available 24/7 during the construction period.
