

Coromandel and Hauraki state highway

Recovery funding update

Additional Recovery funding for Coromandel and Hauraki: \$21m

State Highway 25

Additional funding allows NZTA to repair various under and over slips on SH25. It will also allow culvert repairs on SH25 at Waikiekie Stream, along with repairing drainage between Whitianga and Waihi.

Coromandel clean fill sites

Ongoing recovery work across the region has caused current clean fill sites to reach capacity. This specific funding will allow new clean fill sites to open within the region, ensuring we are not having to truck material out of the region. It will also enable faster movement of material during any future events that may occur across the Coromandel.
