

Long-term emerging programme

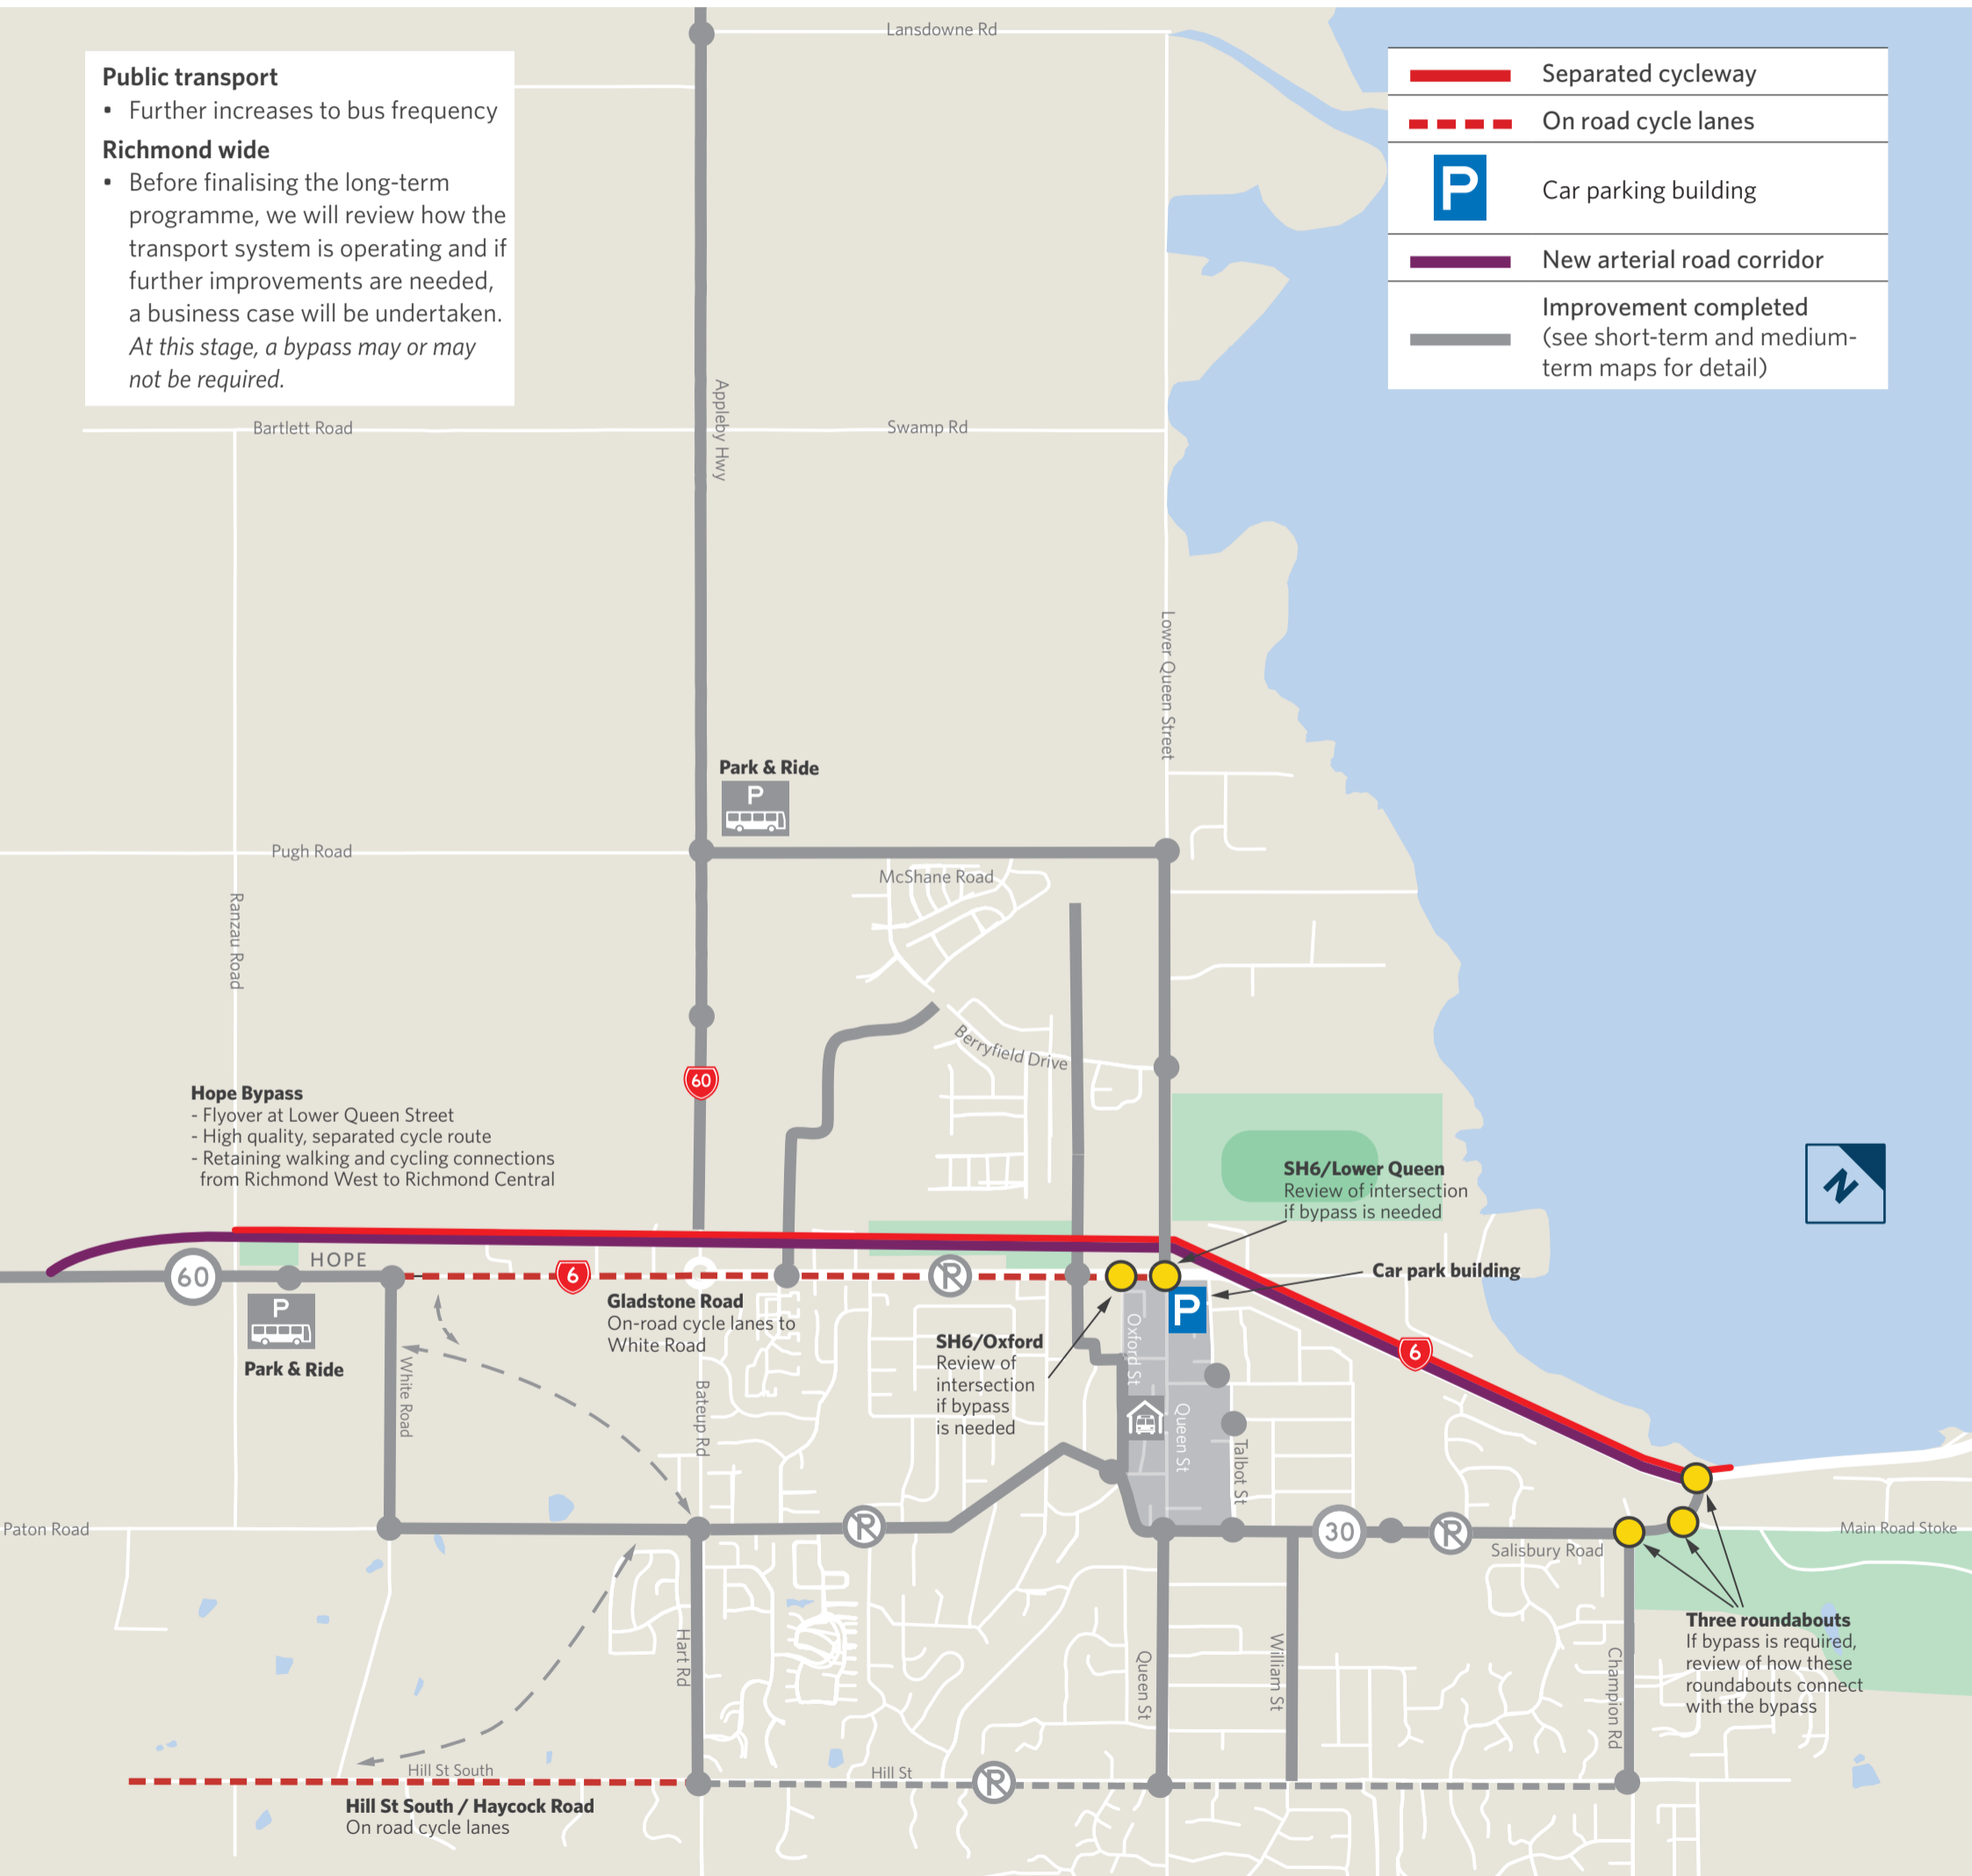

Public transport

- Further increases to bus frequency

Richmond wide

- Before finalising the long-term programme, we will review how the transport system is operating and if further improvements are needed, a business case will be undertaken. *At this stage, a bypass may or may not be required.*

	Separated cycleway
	On road cycle lanes
	Car parking building
	New arterial road corridor
	Improvement completed (see short-term and medium-term maps for detail)

Disclaimer: The proposed staged programme is still under development and no approvals or funding commitment from the Tasman District Council or Waka Kotahi have been made at this time. Many of the elements in the programme will require further investigation (including further community engagement).
