

Tinwald Corridor improvements

Construction under way in Tinwald

Construction of the Tinwald Corridor Improvements project, which will make it safer and easier to get around, is under way.

You may have seen members of the team from Fulton Hogan, who were awarded the construction contract, getting to work on this project over the last couple of months.

So far, work has included setting-up the site, installing the services needed for traffic and rail signals as well as widening Lagmhor Road, kerb and channel replacement and footpath repairs to Agnes Street.

Further updates throughout project

We have included an overview of the work that will be completed but will issue more detailed updates as the project progresses.

Work overview

The first phase of construction, which is mainly focused around the SH1/Lagmhor Road/Agnes St intersection, includes installing the new traffic lights, upgrades to the Lagmhor Rail crossing, road widening and safety improvements to the pedestrian thoroughfare.

Once the first stage is complete, work will shift to other parts of Tinwald. Raised safety platforms will be installed on Melcombe St as well as cycle-separator strips and new road markings. Improvements will also be made to the viaduct, including a new footpath and a pedestrian refuge.

An artists' impression of what the raised safety platform will look like.

What will this mean for you, the Tinwald community, and travellers?

It is inevitable there will be some disruption. However, we have developed construction methods to ensure the work can be done safely, for both the public and workers, while also minimising disruption to residents and local businesses.

Measures will be put in place to minimise noise, dust, and vibration levels.

We will always work to maintain access to shops, businesses, and services. However, during the coming months, while we do the work, there will be changes to traffic management. This could include road closures and turning restrictions at the state highway intersection. As a result, it might be necessary for you to reduce your speed and/or take a short detour to get to your destination. These will be well signed, and we will give as much notice as possible about changes.

Hours of work

Most work will be carried out from Monday to Friday between 7:00am and 7:00pm, and on Saturdays if needed.

Occasionally, there will be a need to work at night and if we do, the majority will be on the state highway. Night work is undertaken when the work would be too disruptive to traffic during the day. We will keep the public informed in advance.

About the NZ Upgrade Programme

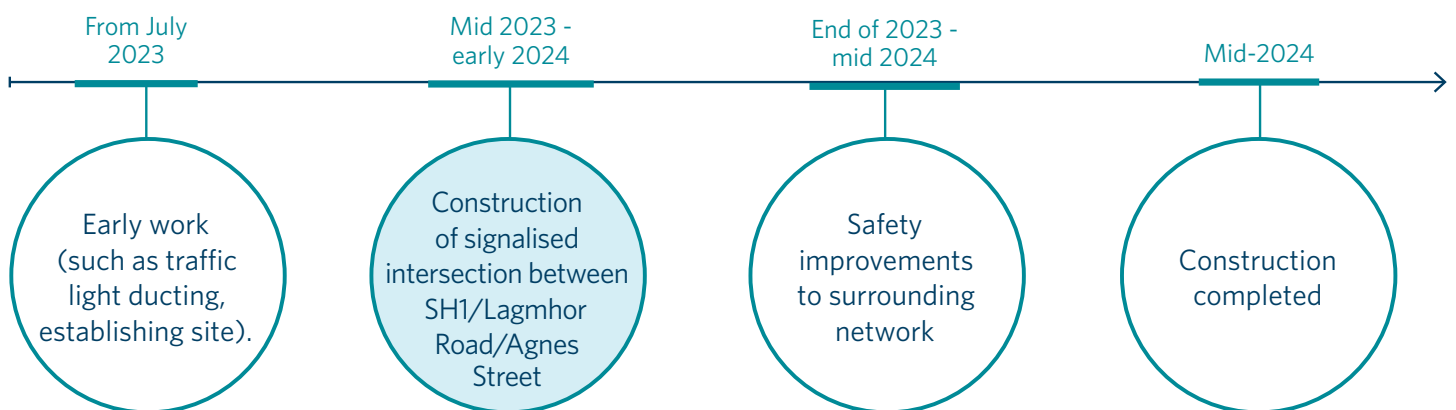

Waka Kotahi is delivering this project as part of the New Zealand Upgrade Programme (NZUP) – the government’s \$8.7 billion investment in growing communities across the country.

Through NZUP, communities can look forward to transport improvements that provide more travel choices, help people get where they’re going safely and grow our economy, while responding to the impacts of travel on the environment.

Timing

Staying up to date

One of the fastest ways to find out what is happening on a regular basis is to subscribe to our electronic updates by visiting this webpage: www.nzta.govt.nz/projects/sh1-tinwald

If you scroll down the page a bit, you will see a “subscribe to updates” field which invites you to leave your name and email address, so that we can email you directly with any significant changes to traffic management.

Who to contact

Please contact Fulton Hogan on **0800 ROAD FH** (0800 7623 34) Monday to Friday, 8am-5pm, to discuss any specific access needs such as nurse/doctor visits or Meals on Wheels deliveries to your property. Contact at anytime if the matter is urgent.

If you have a more general query about the project, please email us at tinwald@nzta.govt.nz
