

2

Making Waihi to Omokoroa safer for everyone.

People make mistakes.
But they shouldn't have to die for them.

Safe Roads is a \$600 million programme aimed at preventing people from dying or being seriously injured on our rural roads. We all know people make mistakes, but there are changes we can make to our roads so simple mistakes don't cost lives.

2

Making Waihi to Omokoroa safer for everyone.

What kind of things can we do?

Most of the deaths on our roads are caused by head-on collisions or people running off the road and hitting roadside hazards such as trees, poles or deep ditches. There are changes we can make to our roads so simple mistakes don't cost lives, such as:

rumble strips

wider centre-lines

more appropriate speed limits

80

shoulder widening

safety barriers

better signage

Locals know their roads best, so we will work with communities to find the right mix of safety solutions that fit with the way they use the roads.
