New variable speed limit during peak school times

Electronic variable speed limits for schools

Variable speed limits are an enforceable speed limit when activated during peak school times. This variable speed limit will operate from 8.25-9.00am and 2.55-3.15pm during school term. It may also operate at other times when there are school-related vehicle or pedestrian activities. When the variable speed limit is active, the speed limit is 30km/h and is displayed on an electronic sign. At all other times, the speed limit is 50km/h.
