

TAKAKA HILL REPAIRS

Getting your road back up and running

The NZ Transport Agency is committed to getting the Takaka Hill road back up and running following Cyclone Gita last year.

We've made great progress repairing the more minor slip sites and re-construction on the more significantly damaged sites is starting soon.

REPAIRS TO MAJOR SLIP SITES

We'll reinstate the road at the major slip sites using reinforced earth retaining walls and rock filled facing.

Key

- Major slip site (to be repaired)
- Minor slip site (completed)
- Traffic light location
