

Over the next few of weeks, we'll be installing barriers along Halswell Road between Hendersons Road and Curletts Road to separate the lanes of traffic. Once the barriers are in place, right turns into and from properties along this stretch of Halswell Road will be removed. Drivers will be able to change direction at the next available side street.

The barriers will not be installed across side streets unless we need to put a road closure in place for any future work we need to do.

*The photograph to the right is an example of barriers in use elsewhere in the country.*

The barriers help to keep cyclists, other road users and road workers safe, and encourage drivers to keep to the reduced speed limit. They also reduce the number of road cones on the road and the risk of road cones being blown into a live traffic lane and retrieved by road workers.

The barriers will be installed at night with little to no noise and will be in place until the permanent raised median is installed.

We appreciate this is a change for residents to get used to.

If you have any queries regarding this work please give us a call.

Kind regards,

The Fulton Hogan Communications Team 0800 ROAD FH (762 334)
